

Donetsk People's Republic

INDUSTRIAL POTENTIAL OF THE DPR

catalogue of enterprises

2021

DEAR FRIENDS!

The Donetsk People's Republic is a young state on the territory of Donbass – the region, which had for several hundred years been a significant industrial center of the Russian Empire and later the Soviet Union.

Today we build our statehood, focusing on the development of the Republic's productive capacity. Our core industries are coal and metallurgy, machine-building and chemicals. We are actively developing agriculture and intensifying construction processes. Education and medicine are well advanced in the Donetsk

People's Republic.

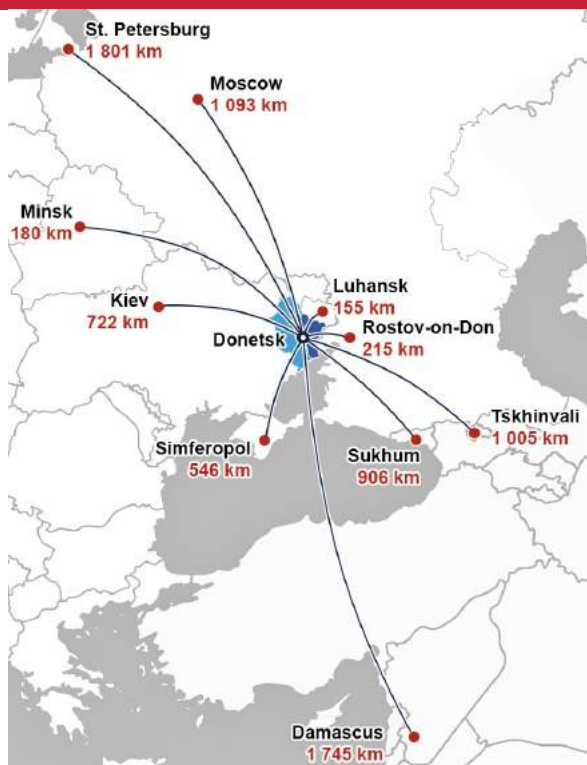

In the difficult conditions of our state's formation we have learned to use all opportunities for cooperation, including international one. We create enabling environment for business interaction and aim to attract foreign partners.

The development of cooperation with the Syrian Arab Republic is highly appreciated in the Donetsk People's Republic. We are grateful for the attention and interest of Syrian officials, business representatives and civil society organizations in the natural, industrial and labor resources of Donbass.

I express the hope that business contacts will be further developed and lead to mutually beneficial results.

Best wishes for success to the Syrian people,
Head of the Donetsk People's Republic
Denis Pushilin

GENERAL INFORMATION

Donetsk People’s Republic is located in Eastern Europe, it has access to the Azov Sea and has a territory with the large industrial potential.

The Donetsk People’s Republic:

13 cities of Republican importance

4 districts of Republican importance

8 cities of regional importance

65 urban settlements

362 rural settlements

8956,6 km² Total area

30 km Coastline

140 m Average altitude

2212,5 km The length of motorways

2370,3 km The length of the main railway tracks

2,2 million people Population

249 person per km² Population density

1,4 million people Working population

Donetsk Capital

EXPORT POTENTIAL OF THE DONETSK PEOPLE'S REPUBLIC

Because of the current geopolitical situation and the economic blockade by Ukraine and EU countries, the economic and industrial development of the territory is extremely difficult.

The internal market is unable to ensure the loading and growth of production of powerful mining and metallurgical, machine-building and chemical complexes, which have historically been created to meet the industrial needs of the central and southern regions of the Russian Empire, the Soviet Union and Ukraine.

In this connection, the prospects for the development of the Republic's industrial complex lie in the context of close integration into the economic space of the Russian Federation, which means that the development of the export component of industrial production is a priority.

On this basis, following the most urgent tasks for the Republic's industrial complex should be highlighted:

- the formation of the external market for Republic's industrial enterprises and the development of their export capacity through the removal of administrative barriers preventing the free entry of Republic's industrial products into the market of the Russian Federation, the EurAsEC countries and the Far East countries;
- increasing export in traditional markets for a more rapid revival of the Donetsk People's Republic industrial complex and further restructuring of the economy;
- raising the efficiency and scale of the export activities of the Donetsk People's Republic industrial enterprises by increasing the range and quality of products;
- export promotion through tax reduction for exporting enterprises, establishment of a system of preferences for industrial enterprises, provided that they develop the export component of production;
- creation of conditions for the development of a republican system of technical regulation that meets all the requirements of international standards and best

international practices in the field of conformity assessment, ensuring quality control of manufactured industrial products for export purposes against the background of increasing requirements for consumer and environmental characteristics, as well as product safety.

Despite the difficult political situation, the industry of the Donetsk People's Republic is export-oriented.

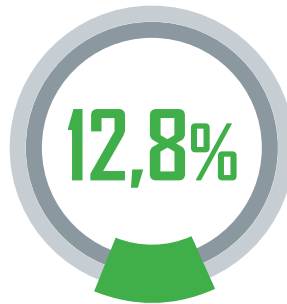

At present, the Donetsk People's Republic, as a supplier of goods and services to the markets of the Luhansk People's Republic, the Russian Federation, Kazakhstan, the EurAsEC countries and the Far East countries, demonstrates its possibilities and shows itself as a reliable partner, with whom it is possible and necessary to build long-term trust production and trade relations.

The catalogue of enterprises "Industrial potential of the Donetsk People's Republic" will become a guide in formation of trade and economic relations and realization of promising projects between the Donetsk People's Republic and the Syrian Arab Republic.

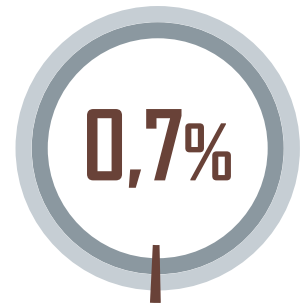

**THE SHARE OF INDUSTRIES
IN THE TOTAL VOLUME OF EXPORT OF INDUSTRIAL PRODUCTS FOR 2020**

Metallurgical industry

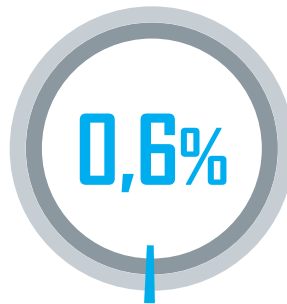

Machine-building industry

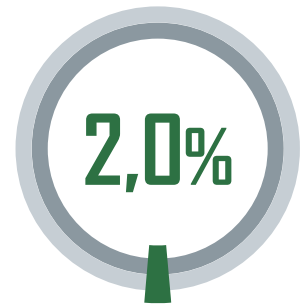

Construction materials industry

Chemical and pharmaceutical industry

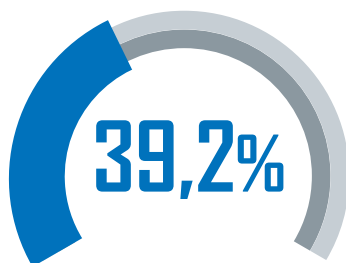

Light industry

Production of paper and cardboard

Metallurgical industry

Export Structure

Raw materials

Industrial goods

Main exported products:

- cast iron;
- wire rod;
- long products;
- coke;
- pipes;
- cable and wire products.

Main exporters:

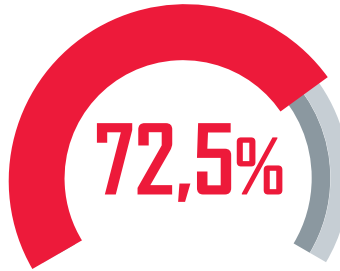

- Branches of Vneshtorgservis CJSC:
 - No. 2 Yenakiyevsky Metallurgical Plant
 - No. 3 Makeyevsky Metallurgical Plant
 - No. 4 Yenakiyevsky koksokhimprom
 - No. 5 Khartsyzsk Pipe Plant
 - No. 6 Yasinovsky Coke and Chemical Plant
 - No. 7 Makeyevkoks
 - No. 8 Komsomolskoe rudoupravlenie
- Branch No. 1 KHSPKZ Silur ROSTEKSPSNAB 8 LLC
- LLC DMZ
- LLC Makeyevsky cable Plant
- LLC Khartsyzsk cable plant Energo
- LLC Remkommunelektrotrans Plant

Machine-building industry

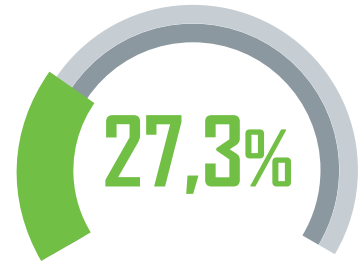

Export Structure

Raw materials

Industrial goods

Consumer goods

Main exported products:

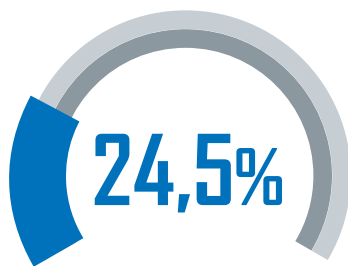

- refrigeration equipment;
- equipment for aircraft engines;
- mining equipment;
- fire-service equipment.

Main Exporters:

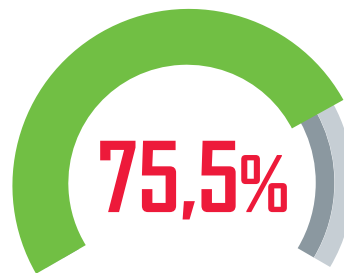

- LLC DONFROST
- LLC AVIATECH Donetsk Branch
- LLC Debal'tsevo Metallurgical Engineering Plant
- LLC NPO Yasinovataya Machine-building Plant
- LLC INTERCOD
- Makeyevsky plant Lazer
- LLC Koksokhimoborudovanie Plant
- SE Donetskgormash
- LLC Khartsyzsk Machine-building Plant

Construction materials industry

Export Structure

Raw materials

Consumer goods

Main exported products:

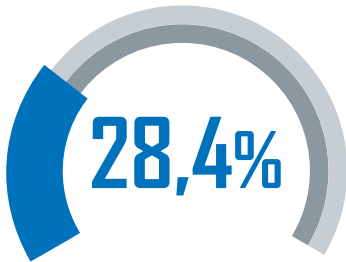

- cement;
- slate;
- asbestos-cement pipes;
- PVC products.

Main exporters:

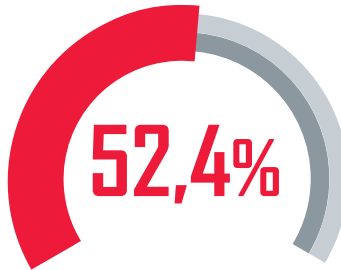

- BRANCH No. 1 LLC PIK-CEMENT+
- LLC TECHPROM
- LLC BAUER
- PE MODUS

Chemical and pharmaceutical industry

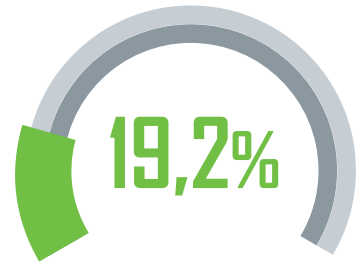

Export Structure

Raw materials

Industrial goods

Consumer goods

Main exported products:

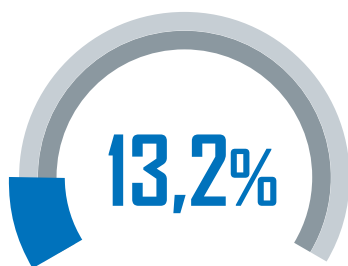

- coal pitch;
- packaging material;
- pharmaceutical products;
- antiseptics;
- household chemicals;
- paint and varnish products.

Main exporters:

- BRANCH No. 1 LLC CHIM STIL INVEST
- LLC STIROLBIOFARM
- LLC SAREPTA-MEDIPLAST
- LLC KDN No. 2

enterprise

ARZ EMPLOYEE-OWNED ENTERPRISE

Address: 1G Marat st., Enakievo, 286400

Tel.: +38 (050) 647-37-69, +38 (071) 304-83-17

E-mail: erz3@mail.ru, erz@mail.ru

Employee-owned Enterprise ARZ specializes in the manufacture of connecting elements of flexible arch fastening. Metal goods are made both from their own material and from the customer's material. The company can also perform turning and milling operations of any complexity.

Main types of products:

- flanges;
- peaks;
- tension pin;
- clamps of various configurations;
- foundation bolts (anchor bolts);
- foundation frame;
- anchor blocks;
- bolts;
- nuts.

Address: 2b Vyatskij per, Donetsk, 283017
Tel.: +38 (062) 332-26-51, +38 (071) 358-30-92
E-mail: sbut.arcsel@gmail.com

The company was founded in 2000 and specializes in the production of welding materials (electrodes and wire) for electric arc welding.

The company has organized 100% input control of input raw materials and materials, control of production operations and the quality of finished products. The company has its own testing laboratory fitted with equipment, instruments and methods necessary for performing input control of raw materials, monitoring and maintenance of technological processes, acceptance tests of finished products. The output range includes more than 100 grades of electrodes and more than 15 grades of wires (powder, high - and low-alloy).

Main areas of activity:

- production of welding electrodes.

Main types of products:

- electrodes for welding alloy steels, non-ferrous metals and alloys;
- electrodes for surfacing, for welding heat-resistant steels, for welding cast iron;
- general-purpose electrodes for welding carbon low-alloy and alloy steels;
- electrodes for manual arc cutting;

- high-alloy welding wire, solid-section welding wire.

Production capacity:

- 150 tons of finished products per month.

VOŠTOK-METIZ LLC

Address: 4B Khmelnitsky st., Khartsyzsk, 286700
Tel.: +38 (06257) 431-66, +38 (071) 341-77-31
E-mail: stal-kanat@ukr.net

The company specializes in the production of metal products.

Main types of products:

- wire;
- mesh;
- construction nails;
- fiber;
- the rope.

DOKUCHAEVSKY FLUX-DOLOMITE PLANT BRANCH NO. 14 OF VNESHTORGSERVIS CJSC

Address: 2 Telman st., Dokuchaevsk, 285740

Tel.: +38 (071) 123-01-23

E-mail: info@dfdk.ru

SE DFDK was founded in 1912 and is one of the largest mining and processing enterprises for the extraction and production of flux limestones (ordinary and dolomitized), as well as the only enterprise for the extraction and production of metallurgical dolomites.

Main types of products:

- ordinary flux limestone used as a fluxing component in the production of cast iron and steel, as a raw material component for the production of cement clinker, as well as for the production of lime in the sugar industry;
- dolomitized flux limestone is used as a fluxing component in the production of cast iron and steel;
- flux dolomite is used in the iron industry as a flux, as well as for filling the baffles of two-shaft open-hearth furnaces;
- raw metallurgical dolomite is used for firing on metallurgical dolomite, as well as for filling two-shaft open-hearth furnaces;
- low-iron dolomite-used in the glass industry;
- flux dolomite ferruginized -used as fluxes in the ferrous metallurgy;

METALLURGICAL INDUSTRY

- crushed stone is used for the construction of highways, as well as in the construction industry;
- burnt metallurgical dolomite is used for repairing and refueling of metallurgical furnaces.

DONETSK POWER TRANSMISSION TOWER PLANT PJSC

Address: 17 Bekhtereva st., Donetsk, 283058

Tel.: +38 (062) 332-15-00, +38 (071) 331-75-10

E-mail: dzvo@dzvo.dn.ua

PJSC Donetsk Power Transmission Tower Plant is a specialized enterprise for the manufacture of metal constructions of power transmission tower, gantries of outdoor switchgear substations with a voltage of 35 kV and higher, barrier-type road guardrails which operated in neighboring countries and beyond.

The construction of towers are manufactured according to the unified drawings of the customer. All elements of the towers are hot-dip galvanized, which guarantees high corrosion resistance for 25-30 years of operation. The thickness of the zinc coating is from 80 microns and above, depending on the technical requirements of the customer's project or according to the technical specifications.

PJSC DPTTP – is a leader in the implementation of anti-corrosion protection of metal constructions by hot-dip galvanizing. This method is a simple and effective way to protect steel structures, including complex shapes. It allows to extend the service life of constructions and improve their appearance.

The quality management system meets the requirements of the ISO 9001:2008 standard and is used in the design, development and production of galvanized, painted and primed metal constructions of power transmission towers, gantries of outdoor switchgear, towers, masts and road guardrails, as well as fasteners.

Main types of products:

DONETSK PLANT ELEKTROISTOCHNIK LLC

Address: 1 Umova st., Donetsk, 283008
Tel.: +38 (071) 498-31-05, +38 (050) 281-21-51
E-mail: akkumov10@gmail.com

LLC Donetsk Plant Elektroistochnik was founded in 2002.

Main areas of activity:

Processing of lead and its alloys (the production cycle is completed).

Production of lead-acid starter batteries with a voltage of 6V and 12V, designed for starting engines and powering of electrical equipment:

- automotive equipment;
- mechanized equipment;
- special construction equipment;
- motorcycle equipment;
- diesel locomotives;
- traction batteries with modified shell-type electrodes.

The company's products are widely represented on the market of the Russian Federation.

DONETSK METALLURGICAL PLANT LLC

Address: 141 Ivan Tkachenko st., Donetsk, 283062

Tel.: +38 (062) 217-23-80

E-mail: office@donmz.ru

Donetsk Metallurgical Plant was founded in 1869. The first cast iron was obtained in 1872. It specializes in the production of cast iron, steel, long and flat rolled products, church bells, building materials, slag products and lime production products.

The main workshops of the plant include: blast furnace, electric steelmaking, rolling, drop-hammer plant. Auxiliary workshops: transport (railway and motor transport), slag processing workshop of blast furnace and steelmaking processes, foundry, mechanical, gas, oxygen-compressor, networks and substations, water supply.

Main types of products:

- pig iron and cast iron (GOST 805-95 PL1, PL2; GOST 4832-95 L1-L6);
- continuous cast steel billet with a square cross-section of 100x100 mm, 120x120 mm, 125x125 mm, 130x130 mm, 150x150 mm with a length of 6000-12000 mm made of carbon, constructional, low-alloy, alloyed commercial quality and high-quality steel grades.

Production capacity:

- cast iron - up to 1.2 million tons per year;
- steel – 390 thousand tons per year.

The technology of blowing pulverized coal fuel has been implemented in the blast furnace shop of the plant, which allows to reduce the specific consumption of coke, as well as technologies for the production of advanced high-quality cast iron (with a low content of impurities) and nodular cast iron. The DSP-120 arc steelmaking furnace in the smelting process can work using mixture of various types of raw materials (scrap metal, liquid cast iron, direct reduced iron).

Address: 86A Molodykh Shakhterov st.,

E-mail: donpromkabel@gmail.com

Site: donpromkabel.com

LLC Donpromkabel was established in 1996 and specializes in the production of cable and wire products for industry and mines.

Process managers and specialists of working professions with more than 30 years experience in the cable industry are working at the plant.

Main areas of activity:

- flame-resistant halogen-free cable;
- cable that does not spreading burning with low smoke emission;
- power and control cable;
- high-voltage cable with paper-oil insulation and made of cross-linked polyethylene;
- cable for mines;
- self-supporting wire (SIP) and fittings for its fastening;
- connecting wire and cord (PVS, ShVVP);
- the installation wire.

Main types of products:

KVVG, KVVGng, KVVGng-LS, KVVGЕ, KVVGEng, KVVGEng-LS, AKVVG, AKVVGng, AKVVGng -LS, AKVVGЕ, AKVVGEng, AKVVGEng-LS, VVG, VVGng, VVGng-LS, AVVG, AVVGng, AVVGng-LS, VVGngFRLS, PVS, PVSng, PVSng-LS, ShVVP, SHVVPng, SHVVPng-LS, VVG-P, VVGng-P, VVGng-LS-P, SIP 4, SIP 5, VBbSHv, VBbSHvng, BbSHvng-LS, AVBbSHv, AVBbSHvng, AVBbSHvng-LS, KVbBSHv, KVbBSHvng, KVbBSHvng-LS, A, AS, PV-1, PV-2, PV-3, PV-4, KGT, NGSHM, VP, KSSHA, KTPEPSHv, KTPEPBbSHv, KTPEPPbSHv, KGVSH, KSHVEBbSHv (1, 2 and 6 kV), KGESHTV, KGESHV, KGESHT (KGESH).

Production capacity:

- copper processing – 200 tons per month.

Additional information:

- Certificate of conformity of the DPR "Standard of Donbass";
- Certificate of conformity of the GOST R certification system;
- Certificate of conformity of the voluntary certification system "SMK STANDARD".

YENAKIEVSKY KOKSOKHIMPROM BRANCH LLC DONETSK METALLURGICAL PLANT

Address: 1 Marat st., Yenakiyevo, 286046

Tel.: +38 (06252) 953-10

E-mail: chaoekhp@gmail.com

One of the first plants of the coke-chemical industry of Donbass, the enterprise with a full cycle of processing of coals into coke and coke-chemical products, about 20 types, including one of the most valuable chemical products – ammonium sulfate (ammonium sulphate).

Main types of products:

- metallurgical coke;
- coke fines;
- coal tar, coal-tar electrode pitch;
- coke nut;
- ammonium sulfate of coking chemical production;
- crude benzene;
- raw materials of coke-chemical for the production of carbon black;
- naphthalene fraction;
- coal absorption oil;
- cut-back coal tar.

YENAKIYEVSKY METALLURGICAL PLANT BRANCH NO. 2 OF VNESHTORGSERVIS CJSC

Address: 9 Metallurgov ave., Yenakiyevo, 286429

Tel.: +38 (06252) 923-01

E-mail: emz.priemnaya@emzsteel.com

The company was founded in 1897 and specializes in the production of metallurgical products. The enterprise of a full metallurgical cycle, consists of an agglomerative shop, a blast furnace shop (2 blast furnaces), a converter shop. The converter shop consists of 3 converters, each with a volume of 160 tons. Metal processing is carried out on the ladle furnace. Metal casting is carried out on 2 continuous -casting machines. Cutting of the continuous cast billet is performed on hydraulic shears.

Main types of products:

- iron ore agglomerate for blast furnace production from a mixture of sinter ore, iron ore concentrate and other materials;
- conversion pig iron;
- continuously cast billet of square cross-section.

Steel qualities range:

- rimmed steel;
- semikilled steel;
- killed steel;
- low-alloy steel;
- medium-alloy steel.

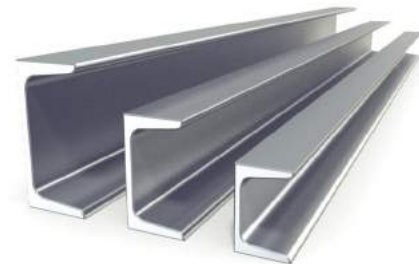

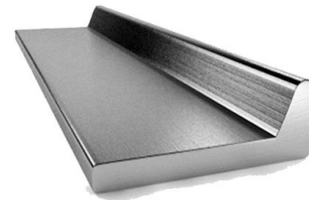

Steel qualities range of heavy section mill 550:

- channels;
- i-beams;
- steel equal angle and unequal angle;
- symmetrical bulb plate for shipbuilding;
- narrow-gauge railway rails;
- profile for elevator guides;
- separate rail fastening clip of the railway track;
- hot-rolled round long steel.

Production capacity:

- agglomerate – 2 million tons per year;
- mill – 155.5 thousand tons per year;
- continuous cast billet – 2.8 million tons per year.

The company implement a quality management system in accordance with the requirements of ISO 9001, which manages all the processes necessary to meet the needs of consumers.

PLANT OF ALUMINUM PROFILES PJSC

Address: 42B Khimikov st., Donetsk, 283057

ЗАВОД
АЛЮМИНИЕВЫХ
ПРОФИЛЕЙ

PJSC “Plant of Aluminum Profiles” was founded in 1997 and specializes in the production of aluminum alloys, aluminum wire rod, aluminum profiles. The company has a laboratory.

Main areas of activity:

- aluminum alloys AB87; AB91; AB95; AB97 in ingots;
- aluminum alloy grade AD-31 in billets;
- aluminum wire rod AKLP-PT chemical composition identical to the grade A5E in coils;
- aluminum profile made of AD-31 alloy of various configurations.

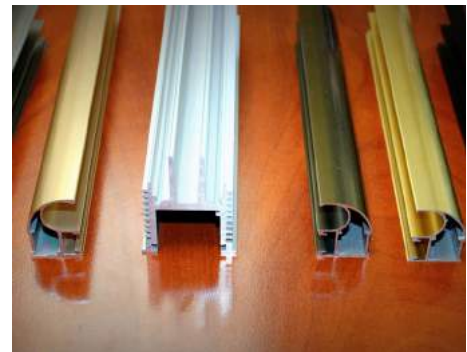

Main types of products:

- aluminum alloys in ingots;
- aluminum wire rod AKLP-PT chemical composition identical to the grade A5E in coils;
- aluminum alloy grade AD-31 in billets;
- architectural aluminum profile;
- aluminum profile for the furniture;
- building aluminum profile;
- standard aluminum profile for household use.

Production capacity:

- 200 tons of aluminum profile;
- 300 tons of aluminum alloy ingots AB-87, AB-91, AK5M2;
- 60 tons of aluminum wire rod.

REMKOMMUNELEKTROTRANS PLANT LLC

Address: 15 Ekonomicheskaya st., Donetsk, 283054

Tel.: +38 (062) 385-68-01, +38 (062) 385-61-58,
+38 (071) 352-66-21

E-mail: sbut_rket@mail.ru

Remkommunelektrotrans plant was founded in 1946.

Main areas of activity:

- foundry goods made of steel 110g 13L according to GOST 977-88;
- foundry goods made of carbon steel (25L-55L, etc. GOST 977-88);
- foundry goods made of pig iron of various grades (SCH20, CHKH1, CHKH2, CHKH28, ACHS-2, etc.);
- foundry goods made of heat-resistant corrosion-resistant steel;
- foundry goods made of chromium-and nickel-alloyed steel (40KH24N12SL, 3KH23N7SL, etc. GOST 977-88);
- mechanical operation of foundry goods.

Production capacity:

- weight of foundry goods from 0.5 kg to 3500 kg.

The plant is equipped with all the necessary technological equipment for the production of high-quality casting. The plant uses molding methods using cold-hardening mixtures (KHTS) and liquid-mobile self-hardening mixtures (ZHSS).

TOREZ PLANT OF SURFACING HARD ALLOYS SUBSIDIARY PRODUCTION UNIT

Address: 83 Trudovaya st., bldg. 4, Torez, 286603

Tel.: +38 (06254) 315-38, +38 (06254) 321-33,
+38 (071) 346-76-06, +38 (071) 320-64-21

E-mail: tznts@list.ru, tznts@inbox.ru

Site: tznts-dnr.ru

Subsidiary Production Unit "Torez Plant of Surfacing Hard Alloys" is a manufacturer of welding, surfacing materials and alloys.

Main areas of activity:

Production of surfacing and welding materials for the restoration and hardening of machine parts and mechanisms operating under conditions of intense abrasive wear, wear during metal-metal friction, at elevated temperatures, high mechanical loads, in aggressive environments.

The company has the ability to manufacture various types of powder surfacing wires $\varnothing 2.0-6.0$ mm, used in the coal and metallurgical industries.

Additional information:

The company has the opportunity to manufacture and ship parts for asphalt mixing machines from a finished product warehouse in Taganrog (Russia): blades; armor sector; slats; armor sheets; racks.

Delivery to the address of the consumer is possible, as well as shipment for the purpose of testing.

KOMSOMOLSKOE RUDOUPRAVLENIE BRANCH NO. 8 OF VNESHTORGSERVIS CJSC

Address: 1 Lenin st., Komsomolskoye,
Starobeshevskij district, 287250
Tel.: +38 (06253) 5-25-28, +38 (071) 343-54-48
E-mail: info@kru.vts1.ru

Komsomolskoe Rudoupravlenie was put into operation in 1934. The company provides flux limestone to the metallurgical, chemical, food industry, construction enterprises and agriculture.

Meantime, the mining administration includes three operating quarries and two crushing and processing plants. Mineral extraction is carried out at the Severny, Yuzhny, and Zhegolevsky quarries.

Extraction of flux limestones is carried out by opencast mining with cyclical-and-continuous method, using motor-conveyor transport. Raw materials processing is carried out using two crushing and processing plants. At all stages of the production process, product quality control is carried out, and as a result ensures its high competitiveness.

Flux limestone is used for converter and ferroalloy production of steel, blast furnace production of cast iron and for foundries, technological limestone – for the production of construction lime, carbide, in the chemical industry - for the production of soda. Crushed stone is used in road construction.

Main areas of activity:

- extraction and processing of flux limestones on the Karakubsky deposit.

Main types of products:

- flux limestone grades: CH-1, CH-2, S-1, S-2, T-1, A, B;
- crushed stone for road construction fractions 3-10, 3-20, 10-20, 10-40, 20-80 mm.

ISTEK LLC

Address: 21 Lenin Ave., Gorlovka, 284637

Tel.: +38 (071) 316-89-78

E-mail: priyomnaya@g-koks.com

The company was founded in 2017 on the basis of the Gorlovsky Coke and Chemical Plant and specializes in the production of coke and chemical products. The company has all the capabilities for the production of high-quality raw materials for the metallurgical industry.

Main areas of activity:

- production of coke and coke chemistry products.

Main types of products:

- blast furnace, coal-fired coke;
- coke nut;
- coke fines;
- coal tar.

Production capacity:

- 434.0 thousand tons of 6% moisture bulk coke per year.

MAKEYEVKOKS BRANCH NO. 7 OF VNESHTORGSERVIS CJSC

Address: 1 Makeyevka, Gorky st., 286106
Tel.: +38 (06232) 223-14, +38 (071) 331-66-18,
 +38 (050) 473-93-09
E-mail: vts.f7@mail.ru

Main areas of activity:

- production of coke and coke products;
- production of fertilizers and nitrogen compounds;
- production of other basic organic chemicals;
- non-specialized wholesale trade;
- freight railway transport.

Production capacity:

- up to 100 thousand tons of bulk coke.

MAKEYEVSKY CABLE PLANT LLC

Address: 17-1 Antropova st., Makeyevka, 286117

Tel.: +38 (071) 358-05-89

E-mail: e_kozakova@mail.ua

The experience and knowledge gained by the enterprise LLC Makeyevsky Cable Works in the process of manufacturing cable and wire products served as an excellent foundation for further modernization and the creation of new technological samples that are not inferior to foreign analogues.

At production site a full cycle of development and manufacture of automated control systems for the entire complex of existing and developed equipment has implemented.

The production of fully complete production lines, as well as individual elements and assemblies, technological equipment and tools has been established.

Skip stranding machines, transmitting and receiving devices, Tandem extrusion line, nodes for forming a compacted conductive core, traction devices – this is not a complete list of equipment that has been tested on our own production facilities. The samples of the machines showed excellent operational characteristics at a low cost.

Adapting to the growing needs of our own production and the market, we are constantly working on modernization of existing samples of equipment and developing new ones.

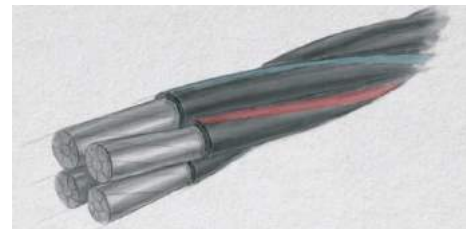

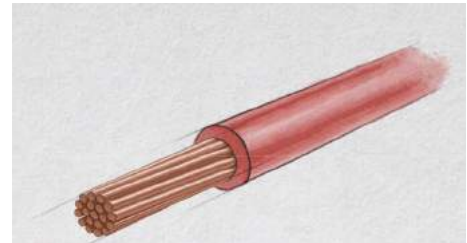

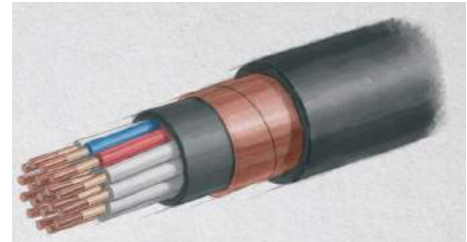

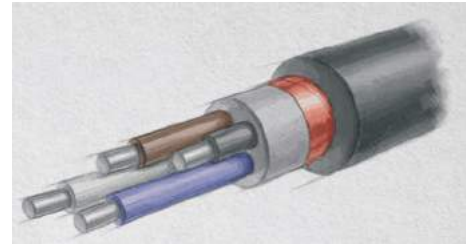

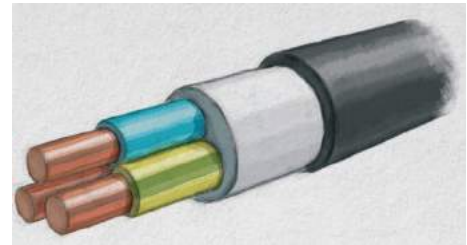

Main types of products:

- power cable: VVGng (A) -LS, VVG-Png (A) -LS, AVVGng (A) -LS, AVVG-Png (A) -LS;
- armored power cable: VBShvng (A) -LS, AVBShvng (A) -LS;
- fire-resistant power cable: VVGng (A) -FRLS, VBShvng (A) -FRLS, PPGng (A) -FRHF;
- power cable with insulation and sheath made of halogen-free polymers: PPGng (A) -HF, APPGng (A) -HF, PPGng (A) -FRHF;
- flexible power cable with insulation and sheath made of thermoplastic elastomers: KGtp, KGtp-KhL;
- control cable: KVVGng (A) -LS, KVVGng (A) -FRLS, KVBSHVng (A) -LS, KVBBShvng (A) -FRLS;
- self-supporting wire for overhead power lines: SIP-4, SIP-2;
- installation and connecting wires and cords: PVS, ShVVP, PuV, PuVng (A) -LS, PuGV, PuGVng (A) -LS.

The equipment used by the plant makes it possible to produce cable and wire products with the number of cores from 1 to 37 and cross-sections from 0.5 mm² to 800 mm².

roduction capacity:

- copper processing - 200 tons / month;
- aluminum processing - 250 tons / month

MAKEEVSKY LITEYNIY ZAVOD LLC

Address: 25 Sverdlova st., Makeyevka, 286108

Tel.: +38 (071) 385-98-19

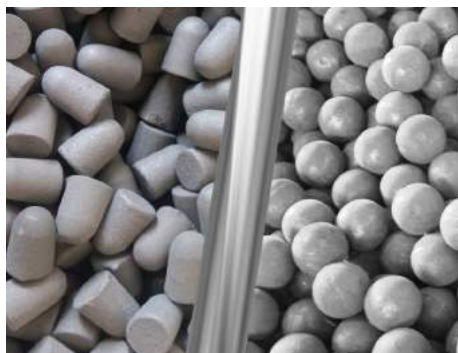

E-mail: sbutotdel@ukr.net

The plant is the largest producer of grinding bodies from wear-resistant cast iron. The enterprise produces grinding bodies (ball, ellipsoid, tsilpebs) which are used in all industries for the preparation and processing of raw materials.

Grinding bodies are used for grinding iron and non-ferrous ore, cement clinker, coal for TPP, building materials. They are used in technology of both dry and wet grinding of raw materials.

The company's products are in demand on the international market. Grinding bodies made of white cast iron without the introduction of alloying additives are three times more resistant to abrasion than similar ones of steel, and their cost is lower by half.

Main areas of activity:

- cast iron casting.

Main types of products:

- cast iron grinding bodies (ball, ellipsoid, tsilpebs).

MAKEYEVSKY METALLURGICAL PLANT BRANCH NO. 3 OF VNESHTORGSERVIS CJSC

Address: 47 Metallurgicheskaya st.,
Makeyevka, 286101

Tel.: +38 (06232) 922-55, +38 (06232) 929-95,
+38 (071) 301-55-51

E-mail: mf.filial3@gmail.com

The company has a quality management system, the technology of rolling by dividing into four streams in the production of reinforcing bar No. 8-12, production of rebar No. 20-22, screw profile (anchoring for fixing mine workings) has implemented.

Main areas of activity:

- production of rolled metal, rail fastenings, the billets;
- recycling of scrap iron.

Main types of products:

- wire rod;
- angles;
- channels;
- reinforcing bar;
- round steel bar;
- PK terminal.

Production capacity:

- the mill 150 - 901 thousand tons per year;
- the mill 390 - 720 thousand tons per year.

PRODUCTION AND COMMERCIAL ENTERPRISE METALLIST PJSC

Address: 17 Antropova st., Makeyevka, 286117

Tel.: +38 (062) 343-53-77, +38 (062) 343-58-70

E-mail: info@metallist.dn.ua

The company was established in 2005 and specializes in the production of high-quality electric welded pipes of small and medium diameter. The technological complex of the enterprise allows to master the production of new pipe profile sizes in a short time.

Main types of products:

- electric-welded profile steel pipes of square, round and rectangular cross-sections made of carbon steel grades.

Production capacity:

- up to 36 thousand tons of pipes per year.

High-precision pipes produced by PJSC "PCE "Metalist" are widely used in construction, machine-building, furniture and other industries.

PROFDONMET LLC

Address: 1G Bauman st., Donetsk, 283055
Tel.: +38 (066) 800-24-21
E-mail: profdonmet@mail.ru

The company specializes in the production of galvanized profiled sheet with a polymeric coating.

Main types of products:

- profiled sheet PS-10 mm;
- profiled sheet PS-20 mm;
- profiled sheet PS-35 mm.

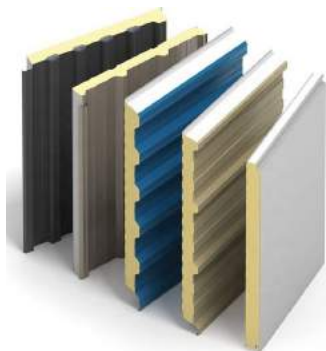

REGIONSTROY-VOSTOK LLC

Address: 133 Shevchenko blvd., Donetsk, 283076

Tel.: +38 (071) 311-94-90, +38 (071) 491-54-72

E-mail: regionstroy-vostok@mail.ru

Main areas of activity:

- production of products for roofing, facade finishing, wall construction.

Main types of products:

- roof sheeting profile, supporting sheeting profile, wall cladding profile;
- metal tile;
- non-standard precast component;
- fences made of sheeting profile (metal picket fence);
- drainback systems;
- roof insulation;
- sandwich panels;
- shaped tube;
- facade cassettes;
- siding;
- profile of facade elements;
- self-tapping screws.

SPETSMASH LLC

Address: 2 Batishcheva st., Donetsk, 283004
Tel.: +38 (062) 345-67-75, +38 (071) 300-77-50
E-mail: cbspecmash@yandex.ru

The company was founded in 1995. Specializes in the production of standard and unified products, as well as non-standard and special equipment, lines, including injection molds, compression molds, punches, devices for mechanization and automaticity, metal constructions - according to the Customer's drawings and (or) according to design and technological documentation developed by highly qualified engineering and technical employees of the enterprise, according to the provided technical specification, sketch or sample. Production capacities and high qualification of designers and technologists allow to develop and manufacture non-standard equipment for different branches of industry: mining, metallurgical, machine-building, chemical, consumer goods, food, for agriculture.

Main areas of activity:

- processing: mechanical, electroerosion, thermal;
- welding: manual, semi-automatic, gas-shielded welding (argon);
- design and manufacture of: technological equipment, non-standard equipment, mechanization tools, metal constructions for various purposes.

Main types of products:

- compression molds for casting parts made of plastics, non-ferrous casting, rubber

- and other equipment of any complexity and for various purposes;
- foundry molds for disposable tableware, gardening equipment, accessories for steel-plastic window systems, medical devices, construction accessories (dowels of different designs), water facilities, sewerage and ventilation systems and other different plastic parts;
 - punches for all kinds of parts.

TRADING HOUSE "DONSPETSSTROY" LLC

Address: 264a Stratonavtov st., Donetsk, 283071

Tel.: +38 (071) 308-45-17

E-mail: donss2015@mail.ru

Main areas of activity:

- cold wire drawing.

Main types of products:

- general purpose wire GOST 3282-74 of any diameter, galvanized and uncoated;
- coppered wire and uncoated welding wire made of steel Sv-08; Sv-08A; Sv-08G2S;
- surfacing wire made of 30KHGSA steel; Sv-08GM; Sv-08G1NMA $\varnothing 0,8-6,0$ mm, supplied in coils of 200-1000kg, skeins of 50-100kg and bobbins of 5 and 15kg;
- wavy steel fiber with curved ends with a length of 30mm, 50mm, 60mm.

Production capacity:

- drawing mills;
- electrochemical pickling wire line;
- fiber machines;
- wire galvanizing line;
- shaft furnace for heat treatment.

DONBASS-LIBERTI FACTORY LLC

Address: 9 Filatova st., Khartsyzsk , 286700

Tel.: +38 (071) 341-77-31

E-mail: auditor@donliberty.ru

The company specializes in the processing of cold-rolled coiled steel and the production of furniture based on metal pipes, as well as the production and processing of wire.

Main areas of activity:

- pipe welding production;
- furniture production;
- hardware production.

Main types of products:

- thin-walled structural electric-welded pipes of more than 80 standard sizes;
- beds, mattresses;
- tables, chairs;
- furniture spring blocks;
- medical and educational furniture.

Address: 1 Tukhachevskogo st., Khartsyzsk, 286700

Tel.: +38 (071) 450-15-80

E-mail: xkz2011@mail.ru

LLC Energo Khartsyzsk cable plant specializes in the production of cable and wire products.

Main types of products:

- aerial non-insulated cable (GOST 839-80);
- power cables applied to GOST 16442-80 of the AVVG type, conductor cross-section up to 50 mm² with a number of cores up to 4;
- self-supporting wires with aluminum-clad conductor;
- polyvinyl chloride insulated cable for electrical installations according to GOST 6323-79 of the APV; APPV; PPV; PV types;
- appliance and connection cords and wires for a voltage of up to 450 v of the types ShVP; ShVVP; PVS;
- heating wires of the types PNSV-1,2 according TU, 16.K 71-013-88.

KHARTSYZSK STEEL AND WIRE ROPE PLANT "SILUR" BRANCH NO. 1 LLC "ROSTEKSPOSNAB 8"

Address: 9 Filatov st., Khartsyzsk, 286700
Tel.: +38 (06257) 783-18, +38 (06257) 780-96,
+38 (06257) 783-03
E-mail: office@silur.org
Site: silur.org

The branch No. 1 of KHSPKZ SILUR LLC ROSTEKSPOSNAB 8 operates on the basis of the Khartsyzsk steel wire and rope plant, founded in 1949. The company specializes in the production of metal goods for the coal, mining, oil refining industry, metallurgy, machine-building, construction, producing of various equipment, household needs and other things.

Main areas of activity:

Production of steel wire and wire products, including: ropes, steel prestressed strands, welded and crimped tightening, screens, slings, fiber.

The company produces products according to interstate standards (GOST), international (ISO), the Russian Federation (GOST R), Ukraine (DSTU), the European Union (EN, DIN, BS), the USA (ASTM), according to technical conditions, as well

REPRESENTATIVE OFFICE IN THE RUSSIAN FEDERATION:

LLC TRK METAVTOPROM

Address: 120/1 Budennovskiy Ave., office 101, Rostov-on-Don, 344011
Tel.: +7 (863) 285-66-96, +8 (961) 426-43-73
E-mail: tpkmap@mail.ru, tpkmap_sbyt@mail.ru

as according to the technical requirements of consumers. The company's products are known in dozens of countries around the world. It was used in the construction of such world-famous objects as the Ostankino TV Tower in Moscow, the monument of Yevgeny Vuchetich "Motherland Calls" in Volgograd, cable-stayed bridges in Riga and Kiev, as well as the Khmel'nitsky, Zaporozhye and South Ukrainian nuclear power plants.

Main types of products:

- steel wire;
- steel ropes;
- steel reinforcement ropes and strands;
- welded and crimped steel wire tightening;
- mesh made of corrugated steel wire;
- welded steel wire mesh;
- single braided steel mesh;
- cargo rope slings;
- cargo slings, textile;
- cargo chain slings;
- the fiber is made of steel wire.

Production capacity:

- wire – 1200 tons;
- ropes – 1200 tons;
- reinforcing ropes and strands – 15000 tons;
- mesh - 600 tons.

Areas of application of products:

- coal industry;
- mining industry;
- oil-producing and oil-refining industries;
- metallurgy;
- industrial, transport and agricultural

- machinery;
- rubber industry;
- construction industry;
- printing industry;
- shipbuilding and ship operation;
- elevator and brake systems.

KHARTSYZSK PIPE PLANT BRANCH NO. 5 OF VNESHORGSERVIS OJSC

Address: 9 Patona st., Khartsyzsk, 286703
Tel.: +38 (06257) 595-01, +38 (071) 345-05-56
E-mail: referentuf5@mail.ru

The plant was founded in 1898. The production complex of the plant consists of pipe and electric welding shop No. 2 (TESTS No. 2) and pipe welding shop No. 4 (TESTS No. 4).

Main types of products:

- longitudinally welded pipe with one seam $\varnothing 508-1422$ mm;
- double-seam pipe $\varnothing 1220$ mm and $\varnothing 1420$ mm with a length of 12,0 m for main water, gas and oil pipelines with an operating pressure of up to 1,8 MPa.

An external and internal anticorrosive coating is applied to the entire range of manufactured products.

The service life of preinsulated pipes is more than 30 years.

The temperature of long-term operation of pipes in soils of various aggressiveness and humidity is from -20°C to $+60^{\circ}\text{C}$.

Production capacity:

- 600 thousand tons of pipes per year.

YASINOVSKY COKE AND CHEMICAL PLANT BRANCH NO. 6 OF VNESHTORGSERVIS CJSC

Address: 5, 50th Anniversary of the Formation
of the USSR st. Makeyevka, 286110

Tel.: +38 (06232) 983-40, +38 (071) 352-74-00

E-mail: filial.6@yakhz.com

Yasinovsky Coke and Chemical Plant was founded in 1953. The plant has mastered the production of Premium blast furnace coke that meets the highest requirements of domestic and foreign metallurgists.

Main types of products:

- metallurgical coke, foundry coke;
- coke fines;
- coke nut;
- ammonium sulfate;
- coal tar;
- crude benzene.

Production capacity:

- 65 thousand tons of blast furnace coke of actual weight when operating 2 batteries.

DONBASS METIZ, LLC

Address: 5 Zavodskaya st., Donetsk, 283069

Tel.: +38 (071) 320-11-55, +38 (050) 534-24-79

E-mail: sm-donbass@yandex.ru

The company specializes in the production of metal products.

Main types of products:

- wire;
- mesh;
- construction nails.

MSO, LLC

Address: 6A Levoberezhnaya st., Donetsk, 283058

Tel.: +38 (062) 387-03-08, +38 (071) 307-36-78,
+38 (050) 474-74-24

E-mail: alina.mso@mail.ru, isksen@mail.ru

The company was founded in 2007.

Main types of products:

- long steel, die-rolled metal, shaped and plate metal products made of carbon, constructional and low-alloy steel grades;
- constructional grid;
- euro fence 2D, 3D with polymeric coating.

O-MET, LLC

Address: 72 Rosy Luxemburg st., Donetsk, 283114

Tel.: +38 (062) 342-90-75, +38 (071) 304-89-99

E-mail: info@omet-donetsk.com

LLC "O-MET" was founded in 2012 and specializes in the design and manufacture of high-quality wear resistant spare parts for rolling mills.

Main areas of activity:

- production of spare parts for wire, light-section and partially medium-section rolling mills (mills 150, 170, 250, 320, 350, 370, 390, 450), and also for pipe welding mills;
- turning and milling works of any complexity according to the customer's requirements.

The company's products are supplied to leading enterprises of the metallurgical industry of the DPR, Russia, Belarus, Moldova, Bulgaria, Poland, Great Britain, etc.

TECHPROMPOLIMER, LLC

Address: 116 Kuibyshev st., Donetsk, 283087

Tel.: +38 (062) 345-94-53

E-mail: tp2005@ukr.net

The company was established in 2004. It specializes in the production of non-ferrous metal alloys on a copper and aluminum basis for the needs of the metallurgical industry and machine-building.

Main types of products:

- wire products for industrial refrigeration equipment.

PIPE-WIRE COMPANY, LLC

Address: 1B Transportnaya st., Makeyevka, 286106

Tel.: +38 (071) 450-15-80

E-mail: artem.kochuenko@gmail.com

LLC Pipe-wire Company was founded in 2005, specializes in the production of cold-worked steel pipe for refrigeration units and cold-drawn wire for the production of mesh, wire for the production of welding electrodes. The company has 3 drawing mills.

Main types of products:

- welded cold sized tube ($\varnothing 4,0-4,76$ mm; $\varnothing 6,0-8,0$ mm) is used in refrigeration units;
- cold drawing wire ($\varnothing 1,4-5,5$ mm) for the manufacturing of mesh, welding electrodes, etc.

Sales markets for finished products:

- DPR (LLC "DONFROST");
- The Russian Federation.

VSEGDA FIRM, LLC

Address: 12 B Khmel'nitskogo Ave., Donetsk, 283087

Tel.: +38 (062)385-49-81

E-mail: 183618@mail.ru

Main activities:

- forging;
- pressing;
- stamping;
- profiling;
- powder metallurgy.

Raw material:

- steel plate kh/k st08ps 1,0x1000x2000.

Main types of products:

- metal boxes for alarm systems.

MACHINE-BUILDING INDUSTRY

— exporter
enterprise

AVIATECH DONETSK BRANCH LLC

Address: 138A Artem st., Donetsk, 283004
Tel.: +38 (071) 344-14-47, +38 (06256) 5-54-25
E-mail: df.aviatech@gmail.com

Donetsk branch of AVIATECH LLC specializes in the production of blades and disks of gas turbine engines. Along with the production of aviation and ground based technology, the company produces a wide range of household consumer goods, for small and medium-sized businesses, agriculture and household farming, as well as for outdoor activities.

Main areas of activity:

- steam boilers: P-0,5-0,8 GN (APK-2102), P-0.5-0.8 DN (APK-2202);
- heating devices: soldering lamps, infrared household heater "OIB-2S", household heating appliance "ANB-1C", household heating appliance "ANB-MINI", tourist primus "PT-2", tourist primus "PT-3", primus lamp "PL-4", gas infrared burner "GGII-3,65", household gas burner "GGB-1";
- attached implements to the single-axle tractor: mounted sprayer "ON-80", mowing unit "KA-ZS", rotary cultivator "KF-1C", rotary cutter "KRN-2S", potato digger "KK-2S", wheels for tilling between rows "KP-4", truck "TC-5" plow "PN-2", tiller, "ON-Z", multi-purpose arrangement of traversing mechanism "UUMP-2", disc tiller "OD-1S", subsurface cultivator "PP-1S", rig snowthrower "SUN-1S", a mounted potato digger "KKN-1S";
- single-axle tractor with a diesel engine "MB-4,05, D6, D6E, D9, D9E";

- motor tiller "MK-6", lawn mower "GC-500-6";
- car maintenance: a set of keys for a car enthusiast "NK-1";
- industrial equipment: high-reliability connecting link;
- household goods: meat grinders "1MCH-S" – cast iron, "1MA-S" – aluminum, "2MA-S" – souvenir; juicers "SBCH-1" – cast iron, "SBA – 1" – aluminum, "SBA – 1C" – souvenir.

Close cooperation with developers and numerous partners, highly professional personnel, a powerful production base, advanced technologies allow to create and produce high-quality products for the population, industry and agriculture.

GERMES LLC

Address: 9 Novolesnaya st., Donetsk, 283117

Tel.: +38 (071) 321-59-04, +38 (050) 625-99-20,
+38 (050) 543-80-39

E-mail: germes_don97@mail.ru, germes@3g.ua

“Germes” LLC was founded in 1998, it specializes in the production of heating solid-propellant boilers from 30 kW till 1000 kW.

The products have no analogues, meet the requirements of the European regulation in all parameters: quality, safety, ecology, economy.

Main contractors:

- “Megainvest” LLC;
- PJSC “Donetskelectrooptorg.”

GORLOVKA MACHINE-BUILDING PLANT "UNIVERSAL" PJSC

Address: 1B Ulegorskoe shosse st., Gorlovka, 284647

Tel.: +38 (071) 317-12-50

E-mail: gmzuniv@i.ua

Site: gmzuniversal.com.ua

**Горловский
машиностроитель**

PJSC Gorlovka machine-building plant "Universal" founded in 1996 and specializes in the production and overhaul of coalmine equipment. From 1997 year, in cooperation with PJSC "Spetsuglemash" manufactures and performs overhaul of powered roof supports and tunneling machines.

Main areas of activity:

- single, double and more acting telescopic hydraulic jacks;
- hydraulic presses from 100 up to 30,000 tons;
- control and distribution hydraulic equipment;
- presses;
- hydraulic racks with internal power supply;
- loading machines and roadheaders;
- pumps;
- gears;
- gearboxes;
- steel frames .

GORLOVSKIY ENERGOMECHANICAL PLANT LLC

Address: 127 Nesterova st., Gorlovka, 284617

Tel.: +38 (06245) 221-71, +38 (071) 321-04-36

E-mail: gemz-zavod@mail.ru

“Gorlovskiy energomechanical plant” LLC produces and repair the steel frames of any complexity (frames,

bunkers, trusses, buntons, supports, beams, racks, hot-wells, separators, tanks, oil seal compensators up to Ø1200 mm, throttle valves up to Ø1200 mm, etc.) with a weight of a separate section up to 5 tons.

Main types of products:

- models of pumps K-20/30, K-45/55, CNS – 300/120...600;
- tubs VG 1.4, VG 1.6, UVG 2.5, UVG 3.3;
- models of pick hammers of the MO-2, MO-6.

DEBALTSEVSKY GEAR CLUTCH COUPLINGS PLANT LLC

Address: 84a Oktyabrya st., Debaltsevo, 283001

Tel.: +38 (071) 303-04-85

E-mail: triakins@mail.ru

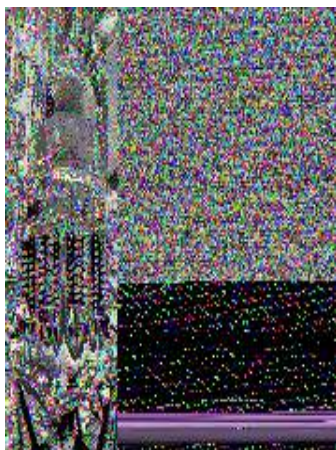

LLC Debaltsevsky Gear Clutch Couplings Plant specializes in the production of high-quality clutch couplings from M3 1 to M3 9 and intermediate ones - from MZP 1 to MZP 9.

In addition to standard couplings, DZZM LLC can produce similar products according to drawings and individual customer requirements, components for lifting and transport equipment.

The tooth surface of the couplings from M3 1 to M3 9 must be treated with high-frequency currents (TVCH). Clutch couplings manufactured by DZZM LLC compensate for radial, axial and angular shaft displacements due to the involute (barrel-shaped) profile of the teeth and have good load-bearing properties.

All products of the plant comply with DSTU, GOST and technical conditions. The plant provides a one-year warranty for all products. The date of issue, the torque, the individual number, which is indicated in the shipment passport, and the company logo are printed on the couplings.

DEBALTSEVSKY METALLURGICAL ENGINEERING PLANT LLC

Address: 84 Oktyabrskaya st., Debaltsevo, 284701

Tel.: +38 (071) 387-62-18

E-mail: dzmm-geron@mail.ru

The metallurgical engineering plant is one of the oldest enterprises equipped with modern technological equipment. It has a complex of main and auxiliary workshops: a foundry with pattern shop and cleaning room, metal structures with welding and assembly sections, machine-assembling No. 1, as well as an energy shop, a step-down electrical substation, compressor and pumping stations.

The plant cooperates with domestic enterprises of heavy engineering, nonferrous and ferrous metallurgy, chemical, oil refining and mining industries. The production technology is constantly upgrading at the plant, the quality of the products is improving. Specialized sites for the processing of components and parts are opened, in order to improve the quality of the foundry's products, a site of HTS with the use of cold hardening mixtures has been opened, the use of modular workholders are expanding. Many measures are taken to develop energy-saving technologies, for this purpose, drying furnaces have been reconstructed.

Main types of products:

- gear couplings MZ-7-MZ-15;
- tuyere device;
- slag device;

- throttle valves;
- equipment under the checkerwork;
- tyres for coke grinders;
- steel ladle;
- hot metal ladle;
- fettling machine;
- goggle valves;
- sectoral valves ;
- refrigerating plates for blast furnaces (panels);
- refrigerating plates blast furnaces;
- plates for lining ;
- slag capsule ;
- gears, shaft gears, gear wheels;
- throttle group;
- wheel pairs with bearing boxes for fettling machines;
- columns of the equipment under the checkerwork.

DOKPROMPOSTAVKA LLC

Address: 5A Malaya Stroitel'naya st.,
Donetsk, 283011

Tel.: +38 (071) 311-69-74

E-mail: dokprom@gmail.com

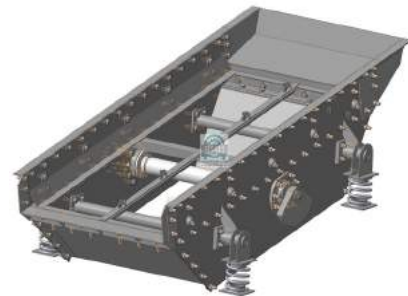

The enterprise was founded in 2008 and specializes in the production of equipment and spare parts for the mining and processing complex.

Main types of products:

- radial thickeners and containers of various configurations;
- flocculant preparation apparatus;
- high-frequency screens of all types: GIL, GWH;
- swinging feeders of all modifications;
- stainless steel slotted sieves and meshes;
- spare parts for screens and filtering centrifuges.

The enterprise had shown itself as a reliable manufacturer, its equipment operated in the DPR, LPR, Russia, Kazakhstan, Georgia, Armenia, Angola, Turkey.

DONETSKGORMASH SE

Address: 189 Ivana Tkachenko st., Donetsk, 283005

Tel.: +38 (062) 344-24-64, +38 (062) 344-24-55

E-mail: donetskgormash@yandex.ru

Site: dngormash.ru

Founded in 1889 as the “Machine-building and iron foundry plant of engineers E. T. Bosse and R. G. Gennefeld”, “Donetskgormash” today is a large machine-building enterprise of the DPR for the production of complex mining equipment with small-scale and individual production, as well as individual machines and components for metallurgical production, heat power and other industries.

SE Donetskgormash is an enterprise of mining engineering of small-scale and individual production of mining equipment, founded in 1889 on the basis of GSHO repair shops.

Main types of products:

- powerful multi-channel and drum lifting machines;
- centrifugal and axial-flow blowers of the main ventilation of mines;
- loading and transport vehicles;

- winches;
- gearboxes;
- underground mine belt conveyors with a belt width from 800 mm to 1200 mm;
- mine parachutes, rig devices, skips;
- rotary equipment for open-pit mining;
- universal car decelerators for railways.

The plant has foundry, forging and pressing, mechanical assembly, welding, tool production, as well as design and technological departments, which causes a closed production cycle for almost the entire range of manufactured equipment.

Donetskormash mining equipment is exported to many countries, including the Russian Federation, Kazakhstan, and Belarus.

DONETSK PLANT "PRODMASH" PJSC

Address: 25 Elektrovoznaya st., Donetsk, 283038

Tel.: +38 (062) 206-82-83, +38 (062) 203-33-73,
+38 (062) 206-87-73, +38 (071) 340-63-96,
+38 (050) 470-91-10

E-mail: prodmash.zavod@mail.ru

Site: prodmash.donetsk.ua

The enterprise was founded in 1955.

Main areas of activity:

- production of equipment for food processing industries.

Main types of products:

- centrifuge for eggs of the FMTSH brand;
- installation Ya16-OPZH for dissolving dry dairy products;
- cheese-making bath D7-OSA, B2-OSV;
- installation for drying liquid products of 4 models: A1-FMYA, A1-FMU, LSV, FMM;
- sausage twisting semi-automatic machine FV-2D;
- Car I1-FT2N-250 for transport of meat products;
- Conveyer GC-1 and GC-2 for carcass transportation.

Main contractors:

- "BOSTON YUG" LLC (Russia), "PROD-MASH" LLC (Russia), "IZHEVSKIY" (Kazakhstan).

DONETSK TRAINING AND PRODUCTION ASSOCIATION "ELECTROAPPARAT" OF THE UASB

Address: 61 Pavshikh Kommunarov ave.,
Donetsk, 283014

Tel.: +38 (062) 345-13-61, +38 (071) 335-13-61,
+38 (095) 825-94-50

E-mail: utos@ua.fm

Site: elektroapparat-utos.narod.ru

The enterprise was founded in 1933 and was a structural subdivision of the society of the blind. Its purpose was to create work places for the people with disabilities.

Thus, their full-fledged rehabilitation and integration into public life was realized. For a given moment, people with disabilities are engaged in the processes of metal processing, assembly of products, casting products from polymers. There is also a press section and tool shops.

Main types of products:

- electrical installation products (electric cartridges E-27, E-14, plug, etc.);
- capping products (canned lids, polyethylene lids, a dispenser for vodka, a wine stopper);
- components for railway rolling stock (flexible connections, shunts, etc.);
- components of the upper structure of the track (rail connectors, switch connectors);
- other products.

DONETSK EXPERIMENTAL MACHINERY AND REPAIR PLANT PJSC

Address: 104 Pavshikh Komunarov Ave.,
Donetsk, 283023
Tel.: +38 (062) 344-02-14, +38 (071) 314-54-48,
E-mail: donermz@ukr.net, donerm_pr@ukr.net
Site: donerm.com.ua

PJSC Donetsk Experimental Machinery and Repair Plant was founded in 1925 and specializes in the production of mining equipment and metal structures for mining, metallurgical and civil engineering. Currently, there are 12 workshops and sites.

Main areas of activity:

- construction of metal structures of any complexity (columns, floor beams, crane beams, trusses, etc.);
- flanging of pipelines with a flanged and quick-release connection with a nominal width from 2 to 24 inches;
- foundry products.

Taking into account the initial specialization and partnership relations with a number of enterprises that have been established for decades, the plant continue to work all the time repairing and manufacturing number of mining equipment (constructions of fixed reinforcement of mine shafts, attachments to drag bar conveyers, pans of various types, tunneling headgear, tunneling shelves, tunneling calf wheels, OSD type formwork, shaft and mine wagons, etc.).

For the manufacturing of the above mentioned products and services, the company has the necessary material, technical and technological base, which is constantly being updated and improved: edge-cutting machines for processing parts up to 14 m long, a press from 40 to 630 tons, leveling machines for plates flattening, thickness up to 40 mm, guillotine shears for cutting metal, thickness up to 32 mm, "Kometa" thermal metal cutting machines, plasma cutting and ASSH.

Welding of structures is effected by: semi – gas-shielded welding (CO₂) is performed by a semi-automatic method, automatic submerged flux by A1416 automatic machines and welding tractors.

To ensure the production of the main products, the enterprise has the entire necessary infrastructure: transport, tool, forging and pressing areas, heat treatment of metal, etc.

Highly qualified engineering and technical personnel of the enterprise ensures high technological level of production.

The mines of Ukraine, the Russian Federation, and Belarus are equipped with DONERM reinforcement. The company's products are known not only in the CIS countries, but also abroad – in India, Iran, Spain, and Israel.

DONETSK ENERGY PLANT DPR SUE

Address: 15 Professorov Bogoslavskikh st.,
Donetsk, 283049

Tel.: +38 (062) 344-07-98, +38 (062) 344-07-77,
+38 (071) 314-63-44

E-mail: sekretar-dez@mail.ru, direktordez2020@mail.ru

Donetsk Energy Plant is a developer and manufacturer of mining and explosion-proof electrical equipment for the coal and mining industries, as well as various types of industrial electrical equipment for gas and oil refining, chemical, metallurgical and other industries, including those with explosive operating conditions.

The plant is fully equipped with the necessary and sufficient set of special technological equipment to perform the full cycle to manufacture transformer substations in explosion-proof and mine modifications, as well as various mining electrical equipment.

A distinctive feature of the enterprise is a full cycle of products manufacturing, transformer steel cutting lines, bench testers: a hydro-test stand, a certified test stand for performance and electrotechnical characteristics of the products.

Main areas of activity:

- transformer substations of the type KTPV, KTPV-D, TSP, 2TSV, PSKTP with a capacity from 100 to 1250 kVA;
- starting equipment - type PVR from 80 to 400A, KUVPP-250;

- automatic switches of the AB-250/400 type AE;
- IPSH type power supplies;
- "Donbass" buses (semi knocked down assembly).

Main contractors:

- Energospetsstroy LLC;
- Rem-Eksim LLC;
- SE "Donsnab";
- Promimpeks LLC.

Additional information:

- Permit No. 0872.18 of the State Technical Authority of the DPR for the use of KTPV;
- Permit No. 0871.18 of the State Technical Authority of the DPR for the use of other products.

DONETSK ELECTROTECHNICAL PLANT DPR SUE

Address: 1A, Tallinskaya st., Donetsk, 283030
Tel.: +38 (062) 343-88-85, +38 (071) 337-29-00
E-mail: sekretar@gp-detz.ru
Site: gp-detz.ru

The State Unitary Enterprise of the DPR "Donetsk Electrotechnical Plant" specializes in the production and overhaul of explosion-proof electrical equipment, machine-building products, and the provision of electrical equipment repair services. The product range is functionally interchangeable and corresponds to the installation and connection dimensions with the products of other manufacturers.

Main areas of activity:

- production of explosion-proof electrical equipment and electric motors for the coal mining and coal refining industries;
- repair of electrical equipment and electric motors;
- production of pipeline sections, tees, bends with quick-detachable connections and flange bolted connections for equipping industrial pipelines of coal mines;
- production of metal structures;
- production of equipment according to individual orders.

Main types of products:

- asynchronous explosion-proof electric motors of the following series: ADVR,

EKVD, VAOD, ADVK, AKDR; VKDV (with a copper-brass rotor);

- intrinsically safe starters of the PVID series;
- explosion-proof dry transformer substations of the VSTP type;
- automatic switches of the AVD series;
- starting units of the APSHD series;
- soft starter of the UVPPD series;
- latticed steel strap 3MR. 000.

Production capacity:

- electric motors-1000 units per year;
- transformer substations – 20 units per year;
- starters – 400 units per year;
- circuit breakers – 300 units per year;
- starting units – 400 units per year;
- soft start devices – 200 units per year;
- mesh tightening – 160,000 units per year;
- pipeline sections – 20,000 units per year.

Repair of electrical equipment:

- electric motors-1000 units per year;
- starting equipment – 400 units per year;
- transformer substations – 30 units per year;
- electromagnets M42 and M62 - 10-15 units per year.

The testing base of the enterprise is equipped with the necessary power testing equipment, test benches and installations, control and measuring devices and measuring tools, which allows without bias and reliably monitor the quality of products and provided services.

DONFROST LLC

Address: 2 Zhukovskogo ave., Donetsk, 283112
Tel.: +38 (062) 341-41-51, +38 (062) 341-41-98
E-mail: office@donfrost.biz

ДОНПРОСТ
ЗАВОД ХОЛОДИЛЬНОЙ ТЕХНИКИ

The company DONFROST LLC was established in 2016 on the basis of a production site for the production of refrigeration equipment of the famous brand NORD.

Main areas of activity:

- production of electrical household refrigeration appliances under the NORDFROST brand;
- production of household electric water heaters TM "NORD", other TM at the customer's request;

- two-compartment refrigerators with an extra freezer;
- two-compartment refrigerators with a lower freezer;
- single-chamber refrigerators;
- freezers.

Production capacity:

- 300 thousand pieces per year.

The quality and safety of products is confirmed by certificates of conformity and test reports of international laboratories.

Main contractors:

- "DIORIT-TEHNIS" LLC (Russia).

PLANT AMPLITUDA LLC

Address: 1 Khodakovskogo st., Donetsk, 283023
Tel.: +38 (062) 29-74-502
E-mail: amplituda@gmail.com, zavod032014kr@mail.ru
Site: <http://zavod-amplituda.com>

The enterprise was founded in 1993 on the base of the Donetsk Electromechanical Plant of production capacities. Over the years it have been modernized and turned into a modern high-tech machine-building production with great creative potential.

The plant specializes in the production and overhaul of battery and contact electric locomotives, the production of components and electrical equipment for them in order to meet the needs of the coal and mining industry in reliable locomotive transport.

Main types of products:

- accumulator locomotives ARP8T, 2ARP8T, ARP5T, ARP7T, ARP2T, ARV8T, 2ARV8T, ARV5T;
- trolley locomotives 4KA, 7KA, 10KA, 14KA, 2*14KA;
- accessories and spare parts for the trolley and accumulator locomotives;
- explosion-proof battery boxes;
- mine trolleys.

The enterprise is constantly improving in the field of its production practice, new inventions make it possible to improve the quality of manufactured products.

Having huge experience in working with CIS enterprises, the plant is constantly trying to expand business ties and invites all interested parties to fruitful cooperation.

PLANT "KOKSOKHIMOBORUDOVANIE" LLC

Address: 286 Mayskaya st., Donetsk, 283030
Tel.: +38 (062) 388-25-66, +38 (071) 314-65-03
E-mail: zkho@zkho.dn.ua

The enterprise is a specialized manufacturer of metallurgical equipment, lifting equipment, construction metal structures, hydro-mechanical equipment and non-standard special technological equipment, spare parts and components for the construction, reconstruction and repair of coke batteries of coke-chemical enterprises of the CIS countries and neighboring countries.

The plant produces armor, frames of the coke oven, doors of the coke and machine sides, upper observation eyes, riser gooseneck, riser tee, screw head, irrigation sprinkler, hatch frame, chargehole lid, door body frame, etc.

Main contractors:

- Union of Heavy Engineering Plants LLC (for OJSC MMK, OJSC Severstal).

Interkod LLC is a manufacturer of special breathing equipment.

Main types of products:

- self-rescuers on chemically bound oxygen;
- compressed air and compressed oxygen breathing apparatus.

Self-rescuers of Interkod LLC are widely used in mining and other industries, and breathing apparatus are used for emergency rescue or other operations where the user must be completely isolated from the environment.

The plant has implemented a quality management system in accordance with the requirements of the international standard ISO 9001. All manufactured production has certificates of conformity, and the SHSS-1PV self-rescuer complies with the European standard EN-13794. The plant has accumulated an extensive experience in the production of mining rescue equipment that meets all up-to-date requirements.

KOKSOBORUDOVANIE LLC

Address: 86 Mayskaya st., Donetsk, 283030
Tel.: +38 (062) 338-25-76
E-mail: koksoborudovanie@gmail.com

The production base of Koksoborudovanie LLC has a closed-looped production cycle from metal smelting to off the shelf equipment producing. Own design-engineering bureau, together with the availability of all main types of machinery production and appropriate equipment, such as metal working CNC machines, allows to execute orders of various complexity level.

Main areas of activity:

- non-ferrous castings;
- customized non-ferrous castings;
- production of reinforcement grid;
- production of metal structures;
- production of reinforcement cages;
- decorative ironwork;
- processing of production(bushings, liners, power line fasteners);
- mechanical processing.

MAKEEVKA PLANT "LASER" PJSC

Address: Makeevka, Sverdlovo town, 286193

Tel.: +38 (071) 416-03-54

E-mail: zavodlazer@mail.ru

PJSC Makeevka Plant "Laser" specializes in the production of mining equipment.

Main types of products:

- underground conveyors;
- rollers of various types and modifications according to the technical requirements of the customer;
- provision of services for mechanical processing of metal products.

Modern machine park and high qualification of personnel having a large experience in this area allow to produce products of high quality at the optimal time for the customer.

REPRESENTATIVE OFFICE IN THE RUSSIAN FEDERATION:

"LASER YUG" LLC

Address: office 401, 10 Trudovikh rezervov ave., Taganrog, 347902

Tel.: +7 (8634) 31-83-65

MAKEEVKA PLANT "FAKEL" PJSC

Address: 7 Parkovaya str, Makeevka, 286154
Tel.: +38 (071) 323-05-77, +38 (071) 398-35-14,
+38 (050) 656-40-60
E-mail: zavodfakel@bk.ru

Makeevka plant "Fakel" was founded in 1981 and specializes in the manufacture of fire safety equipment, and also provides their maintenance.

Fire extinguishers manufactured by "Fakel" plant have an extended field of application, are effectively used to eliminate the combustion of solids, flammable liquids, gases, electrical equipment with a voltage of up to 1140V.

Main areas of activity:

- manufacture of powder fire extinguishers VP-8;
- manufacture of powder injection fire extinguishers VP-6(3) and VP-9(3);
- production of water mine injection fire extinguishers VVSH-9(3);
- maintenance of powder, water, carbon dioxide fire extinguishers.

All products are certified, have a permit for use in mines and comply with international standards.

MAKEYEVSKIY MACHINE-BUILDING PLANT LLC

Address: 49 Sovetskaya st., Makeyevka, 286140

Tel.: +38 (062) 323-45-54, +38 (062) 323-54-64

E-mail: office@makmash.com.ua

Makeyevskiy machine-building plant LLC specializes in producing of equipment, machines, mechanisms, separate units, repair parts, metal structures, precast concrete units, concrete and matrix for metallurgical and machine building enterprises.

Main areas of activity:

- production of technological equipment for metallurgical, by-product coking, chemical, coal and construction engineering branches;
- standard and special metal structures;
- receiver tanks and other pressure-operated containers;
- containers for the tank towers and GSM;
- mining equipment;
- overhead and gantry cranes;
- bridge piers and electric power pylon;
- metal structures and scaffolds;
- forms for the installation of reinforced concrete products;
- forms for the manufacture of reinforced concrete products;
- production of waist rails of steel structures of overhead system of a trunk railway lines;

- ten-hole molds for the production of railway sleepers, tanks;
- repair and reconstruction of mining equipment;
- equipment and spare parts of type and special designs with the development of design documents.

Besides, the Plant produces repair and reconstruction of mining equipment, special-purpose machines with the use of welding, blanking, bending, machining etc.

MARVIK ELECTRIK LLC

Address: 15 Bessarabskaya st., Donetsk, 283058
Tel.: +38 (071) 347-12-32
E-mail: marvik.electric@gmail.com

The organization is a developer and manufacturer of equipment and control units for mining machines, monitoring systems for the operation of mining machines and general industrial equipment.

Main types of products:

- a set of KUP control equipment (in 5 modifications) - for controlling roadheaders KSP 35, KSP 32, PK8MA, MPL22;
- intrinsically safe electromagnet EMI 24-100 U5 - for controlling hydraulic valves of roadheaders;
- intrinsically safe power supplies MIIP12/5000, MIIP24/300, MIIP 24/200 - for use in mining equipment;
- control and protection units of the outgoing connection of the MZPC type;
- intrinsically safe lamps of the SZ03, SZ08 type;
- acoustic radiators of intrinsically safe design;
- pressure, level, temperature sensors for use in mining machines and equipment;
- radio control panels for industrial equipment;
- SLIM local monitoring system - for collecting, pre-processing, packaging, transmission over the information network and radio channel, processing, displaying and storing data about status of equipment;

- power converter equipment of explosion-proof design and control stations for mining machines on the basis of blocks and devices of own design and manufacture.

MASHGORPROM LLC

Address: 1A Rudnichnaya st., Mospino, 283497
Tel.: +38 (071) 358-33-07, +38 (071) 358-33-08
E-mail: d.vumash@mail.ru, office@mashgp.ru

Mashgorprom LLC is a up-to-date machine-building enterprise, the main specialization of which is equipment for the processing industry (shutoff valves, pumps, hydrocyclones), as well as various equipment and spare parts for the mining, energy, metallurgical industry and agro-industrial complex.

Main areas of activity:

- foundry production;
- metalworking;
- metal processing by pressure;
- production of metal structures;
- heat treatment;
- production of monolithic polycrystalline silicon carbide;
- processing of plastics by pressure.

Main types of products:

- equipment for water and sludge production (pumps, shutoff valves);
- transport equipment;
- hydrocyclones;
- mining equipment;

- a complete list of spare parts for equipment of coal washing enterprises.

Major repairs of complex mineral-processing equipment are carried out on the base of the structural division of the Mospinskiy Mechanical Repair Plant.

The company's products are used at coal washing enterprises of the DPR and neighboring countries.

MACHINE BUILDING PLANT "BURAN" ALC

Address: 1A Kirova st., Donetsk, 283011
Tel.: +38 (071) 320-44-02, +38 (050) 900-33-95
E-mail: tat68417800@ukr.net

Additional Liability Company "Machine Building Plant "Buran" was established in 1994 on the base of Rutchenkovskiy Plant of Maintenance and Mechanics. The plant specializes in the production of equipment that is used not only in the mining industry, but also in metallurgy, energy, and machine-building. Besides, the company provides repair services of the machines and mining equipment.

Main types of products:

- mine cages, skips and balance weights;
- belt and drag conveyers for the coal handling;
- hydraulic props and hydraulic advancing cylinders;
- loading structures of ZUM-type;
- swinging feeders.

MACHINE-BUILDING PLANT "ITRAS" SE

Address: 47 Chusovskaya st., Donetsk, 283038
Tel.: +38 (071) 440-71-04, +38 (071) 312-84-28
E-mail: itras@itras.com.ua

The company was founded in 1896. The plant produces mine belt conveyors of various modifications with a belt width from 800 mm to 2000 mm, spare parts for them, centrifugal pumps, barrel casting, and other.

The plant is the only manufacturer and developer of unified telecommunications systems for dispatching control and automated control of mining machines and technological complexes (UTAS).

Production capacity:

- belt conveyors-130-140 pcs. per year;
- UTAS systems – 30 pcs. with 40 subsystems per year.

The plant's products are operated at many enterprises of the Russian Federation, Belarus, Kazakhstan and in other countries.

MACHINE BUILDING PLANT "KANT" LLC

Address: 10b Batishcheva st., Donetsk, 283004
Tel.: +38 (062) 381-93-26, +38 (071) 314-73-57
E-mail: donetsk_kant_mz@mail.ru, oomzkant_makk@mail.ru

Machine building plant "Kant" LLC was founded in 1992.

Main areas of activity:

- capital repair of powered support units of domestic and foreign production;
- production and reconditioning of spare parts of heavy machinery and metallurgy, agro-industrial complex, loaders.

The company's specialists have developed and patented modern technologies of equipment reconditioning by build-up welding of stainless wires of bearing surfaces of hydraulic cylinders in an atmosphere of shielding gases.

SCIENTIFIC AND PRODUCTION ASSOCIATION "DONVENTILATOR" LLC

Address: 50G Tambovskaya st., Donetsk, 283030
Tel.: +38 (062) 388-24-52, +38 (071) 440-71-21
E-mail: donvent-pr@ukr.net

Scientific and Production Association "DONVENTILATOR" LLC founded in 1996, it specializes in the production of industrial ventilation equipment. It is the largest manufacturer of products for the energy, metallurgical, chemical, mining and other industries.

Main areas of activity:

- radial, axial, forced-draft and draft ventilators for general industrial purposes;
- mine fans for local and main ventilation;
- components for ventilators and electric motors;
- repair of ventilators;

REPRESENTATIVE OFFICE IN THE RUSSIAN FEDERATION:

"DONVENTILATOR", LLC

Address: 10 Volokalamskaya st., Rostov, 344064

- dynamic balancing of ventilator impellers.

Main contractors:

- "PROMTECHSERVICE, LLC Russia.

Additional information:

Certified quality management system ISO 9001-2009, certificate TP TC.

RESEARCH AND PRODUCTION ASSOCIATION "YASINOVATAYA MACHINE- BUILDING PLANT" LLC

Address: 31 Artyoma str, Yasinovataya, 286000
Tel.: +38 (062) 364-14-80, +38 (071) 317-79-51
E-mail: info@ymzdn.ru
Site: ymzdn.ru

LLC Research and production Association Yasinovataya machine-building plant (YMZ) is founded in 1947 it specializes in the production of roadheaders (KSP-35, KSP-35-100, KSP-32, KSP-42), mining headers (PK-8MA), trunk loading machines (KS-2U/40, 2KS-2U/40), loading machines (MPL-22), drilling rig unified (BUKS - 1U5), double roll toothed crusher DDZ, spare parts to these kinds of equipment. Also, LLC "YMZ" has the ability to overhaul mining headers UKD-200-250 and 1K101.

The enterprise is one of the leading manufacturers of mining equipment in the post-Soviet area, equipment of the Yasinovatsky machine-building plant is used in more than 30 countries of the world.

The plant has a blanking fabrications fitted out, which is equipped with gas plasma

REPRESENTATIVE OFFICE IN THE RUSSIAN FEDERATION:

"DONETSK BRANCH" YMZ " LLC

Address: 67 Prospect Mira, k.27, Donetsk, Rostov region, 346330

cutting machines with CNC, metalworking high-precision equipment, gear cutting equipment with ample opportunities. The enterprise has its own engineering and technological bureau, which allows the development of modern mining equipment of any complexity, taking into account the wishes of customers.

Main areas of activity:

- production of machinery and equipment for the mining industry and construction;
- repair and maintenance of industrial machinery and equipment;
- installation and assembly of machinery and equipment.

Main types of products:

- Mining header PK-8MA;
- Roadheader KSP-35;
- Roadheader KSP-35-100;
- Trank loading machines: KS-2U/40; 2KS-2U/40;
- Roadheader KSP-32;
- Loading machine MPL-22;
- Drilling rig unified BUKS-1U5;
- Double roll toothed crusher DDZ;
- Mobile tunneling winch LPAP-10;
- Header 2KV-A

Main contractors:

- "SPETSPODZEMMASH YMZ" LLC, Russia.

Additional information:

- Certificate of conformity ISO 9001:2015.

SCIENTIFIC-PRODUCTION ENTERPRISE “MAKEYEVSKIY MINING AUTOMATIC PLANT” PJSC

Address: 1 Kiprenskogo st., Makeyevka, 286115

Tel.: +38 (06232) 272-75, +38 (06232) 274-68,
+38 (071) 317-81-95

E-mail: zbut_ma@mail.ru, mzsha@tr.dn.ua

The scientific and production enterprise “Makeyevskiy Mining Automatic Plant” was established in 1962 and specializes in the development and implementation of automation equipment for tunneling and mining equipment.

The company’s products have high performance properties and reliability, meet international technical standards.

The company’s products are in demand in the markets of the DPR, the Russian Federation, Belarus and Kazakhstan.

SCIENTIFIC AND PRODUCTION ENTERPRISE "SPETSUGLEMASH" PJSC

Address: 9 Volodarskogo st., Gorlovka, 284609

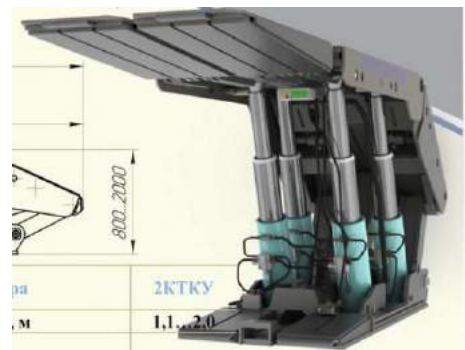

Tel.: +38 (071) 316-91-04

E-mail: specuglemash@ukr.net

Scientific and production enterprise "Spetsuglemash" PJSC was established in 1997 and specializes in the manufacture and repair of various types of equipment and machinery.

Main areas of activity:

- sections of mechanized supports;
- self-engineered mining equipment;
- small rigging equipment;
- control hydro emulsion equipment;
- equipment for metallurgical and steel production;
- pressing equipment;
- hydraulic lifting shafts;
- power hydraulics from hydraulic cylinders and jacks to racks $\varnothing 270$ mm;
- other equipment.

HSCIENTIFIC AND PRODUCTION ENTERPRISE "ENERGIYA" LLC

Address: 13 Progressivnaya st., Donetsk, 283048

Tel.: +38 (062) 203-09-90

E-mail: energia.npp@gmail.com

The scientific and production enterprise "Energiya" LLC was established in 2001. One of the goals of the company's creation was the modernization of locomotive rail mine transport at the coal industry enterprises.

SPE "Energiya" produces mining electric locomotives which comply with the modern European standards. They provide high performance and safety for employees of the coal industry. All products comply with the norms and rules of equipment operation in coal mines.

The mining electric locomotive ERA-V10D is equipped with an additional cabin for the engine driver. Locomotives of the ERA type are equipped with battery boxes AKU-RV, which have a RV level of explosion proofing and are tested for explosion safety. The company also produces high-quality traction batteries of the PzS type for various types of electric transport: from locomotives and loading machines to stacking conveyors and electric vehicles.

The requirement for a long-term service of traction batteries for electric locomotives is the use of a special multi purpose charging device of ZU/77-128 type produced by SPE "Energiya".

The company's products are patented, received permission for use in the mines of the DPR, the Russian Federation, etc., and provides complete safety in the process of underground workings of coal deposits.

NOVOGORLOVSKIY MACHINE BUILDING PLANT LLC

Address: 2 Shchukina st., Gorlovka, 284610

Tel.: +38 (071) 320-64-34

E-mail: buh_ngmz@ukr.net

Novogorlovskiy Machine Building Plant LLC was established in 1947 and is a specialized enterprise producing the equipment for the mining industry.

Main areas of activity:

- production of parts of rock-drilling sinking machines;
- repair and maintenance services of machines and equipment for the mining industry.

During many years of work in the mining equipment market, the products of Novogorlovsky Machine Building Plant have proven themselves well in the CIS countries and in the countries far abroad.

PETROVSKY MACHINE-BUILDING PLANT SUE DPR

Address: 74 Artema st., Donetsk, 283001

Tel.: +38 (071) 308-79-79

E-mail: lana.svetailo@mail.ru

Founded in 1897, the company is acknowledged leader in the development and production of high-quality transport systems. In addition, the plant develops and produces unique automated integrated security systems (SAUPB and UTAS). The plant's products are used in various industries.

Main types of products:

- transport systems, including conveyors, hoppers, loading and other devices, belt conveyor units (including staves, drives, tension stations, rollers, reducers, etc.) and control equipment;
- automated industrial safety management systems (with AUPB) and unified telecommunications systems for dispatching control and automated control of the aerogas environment, machines and technological complexes (UTAS systems).

The company provides repairing services of the above mentioned equipment.

SUE DPR PMZ effectively solves the problems of transporting materials and cargo, in the optimal way selects equipment for its operating conditions.

Main types of products:

- wheel sets and scrap metal formed after disassembly of railway cars unsuitable for operation;
- belt conveyors of various sizes, with a belt width from 400 to 2000 mm.

The warranty for the manufactured equipment is three years for the most severe operating conditions, which is confirmed in the field at enterprises in Russia and Uzbekistan.

Conveyors can be equipped with bearings, hydraulic couplings, electric motors, conveyor belts, etc., produced by world-famous companies.

PRODUCTION COMPANY "DONBASS-AGROMASH" PE

Address: 1 Zhmury st., Donetsk, 283007
Tel.: +38 (071) 330-21-42, +38 (050) 162-83-83
E-mail: donetsk_sv@mail.ru

Production Company "Donbass-Agromash" PE was founded in 2009 and specializes in the production of tillage equipment. The specialists of the plant improve the existing models and develop new ones taking into account the requirements of customers.

Main areas of activity:

- disc and tooth harrows;
- disk headers;
- cultivators;
- rollers;
- spare parts for agricultural machinery AG, UDA, PD, BDT;
- repair and restoration of agricultural machinery;
- spare parts tailor-made.

PROM-VENT-ECOLOGIYA LLC

Address: 11Am Savrasova st., Donetsk, 283011
Tel.: +38 (062) 203-68-15, +38 (062) 203-54-70,
+38 (071) 316-08-60
E-mail: promventeco@promventeco.dn.ua

Main areas of activity:

- production of ventilation systems from rolled sheet metal with a thickness of up to 2.0 mm;
- installation of ventilation systems and ventilation equipment;
- starting-up and adjustment works;
- maintenance and certification of ventilation systems at enterprises of all forms of ownership.

SNEZHNYANSKHIMMASH SE DPR

Address: 101 Sovetskaya st., Snezhnoe, 286510

Tel.: +38 (071) 320-69-88, +38 (06256) 536-74

E-mail: amarant.dn@mail.ru,
himmach-buhgalter@yandex.ru

Site: szhm.ru

Founded in 1946, State Enterprise “Snezhnyanskhimash” – is an enterprise with a large experience and old traditions in the field of production of capacitive, heat-exchange, column and other technological equipment operating under pressure, used for the extraction, transportation and processing of oil and gas, processing of various chemical and petrochemical products. The company’s products are manufactured in accordance with the requirements of ASME (American Society of Mechanical Engineers).

SE “Snezhnyanskhimash” is the only one in Europe with four assigned codes:

- “S” - manufacturing of power boilers;
- “U” - manufacturing of pressure vessels (to 20 MPa);
- “U2” - manufacturing of pressure vessels (over 20 MPa);
- “T” - manufacture of transportable pressure vessels.

Main areas of activity:

- oil and gas separators (OGS);
- oil separators (OS);

- liquid filters (DLF);
- pipe fittings (wyes, withdrawals, transitions);
- column, tank and heat exchange equipment.

The plant has equipment that allows to manufacture products with unique parameters: up to $\varnothing 5,5$ m, length of non-separable unit up to 70 m, body thickness 80 mm and unit weight up to 300 tons.

The plant's products are manufactured in accordance with ASME requirements.

TECHNO-VERTICAL LLC

Address: 2 Georgiy Dimitrova st., Donetsk, 283053
Tel.: +38 (062) 340-52-21
E-mail: koshkina_vf@yandex.ru

It was founded in November 2011. The company specializes in the production of spare parts for the mining industry.

Main types of products:

- scraper chain sections;
- hydraulic cylinders;
- bypass head;
- bushings;
- covers;
- rollers;
- axes;
- sprockets
- ring;
- tool holder.

TECHNOSOYUZ LLC

Address: 8 Terrikonnaya st., Makeyevka, 286123
Tel.: +38 (071) 395-69-55
E-mail: vaskevichmichail@mail.ru, findir@techno.dn.ua

The plant of universal machine-building “Technosoyuz” LLC was founded in 1992.

Main areas of activity:

- production of equipment for the mining and milling industry;
- production of non-standard equipment according to the customer’s drawings.

Main types of products:

- filter and bowl centrifuges;
- radial thickener;
- feeders;
- flat slotted sieves for screens and other machines;
- slotted arc sieves;
- rotors for centrifuges;
- conveyors (belt, chain, screw).

The equipment of Technosoyuz LLC has proven itself in many countries of the near and far abroad (Russia, Kazakhstan, Georgia, Germany, France, Canada).

TOPAZ, SE

Address: 1A Sokolinaya st., Donetsk, 83012
Tel.: +38 (062) 253-13-58
E-mail: topaz.donetsk@yandex.ru

A diversified enterprise that specializes in the development and serial production of complex radio engineering systems and special-purpose complexes, as well as radio engineering products for a wide range of applications. Today it is a modern in terms of technical level, well-equipped enterprise with a closed technological cycle, which maintains a high potential at the technical level.

The production base of the enterprise allows flexible restructuring for the release of new equipment. This is a varied machine park, and special equipment for the manufacture of complex metal structures, precision mechanisms, electronic products, antenna-feeder devices, microwave units. The enterprise has production facilities for the implementation of a variety of projects.

Main areas of activity:

- metalworking;
- heat treatment;
- production of heater plates to 1t of any complexity;
- chemical processing of various materials;
- galvanizing of small propping;
- paint and varnish works;

- manufacturing of multilayer printed circuit boards;
- manufacture of radio-electronic equipment;
- manufacture of cables and harnesses;
- manufacturing of electronic blocks and assemblies;
- soldering of microcircuits of BGA body frames;
- assembly of complex metal structures and products;
- manufacturing of fine works.

Main types of products:

- complex radio-technical systems and special-purpose complexes, radio-technical products of wide application.

Production capacity:

- finished products - 1 200 units.

География сбыта:

- DPR;
- Russian Federation.

TOREZ ELECTROTECHNICAL PLANT SE DPR

Address: 296 Lenina st., Torez, 286600

Tel.: +38 (071) 363-90-53

E-mail: info@gp-tetz.ru

Site: gp-tetz.ru

Torez Electrotechnical Plant was founded in 1949. Initially, he carried out orders related to the repair and restoration of Donbass mines. In 1950, the enterprise launched the production of explosion-proof electrical equipment for the coal industry.

In 2017 on the basis of the complex "Torez Electrotechnical Plant" was created the State Enterprise "Torez Electrotechnical Plant".

The plant specializes in the production of mining equipment and wheeled vehicles. The enterprise is equipped with modern production and testing equipment.

Main areas of activity:

- laser cutting (laser cutting machine TruLaser 3030);
- turning, milling works;
- manufacturing of plastic parts;
- heat treatment and grinding of parts.

Main types of products:

- Starters PVIT-M;
- Connectors SNV-M;
- AVV-400/250;
- AST;
- PVI-MVPP.

Production capacity:

- 300 devices per month.

KHARTSYZSK ENGINEERING PLANT LLC

Address: 2 Kononenko st., Khartsyzsk, 286709

Tel.: +38 (071) 319-56-53

E-mail: donposh_eo@mail.ru

Khartsyzsk Engineering Plant was founded in 1897. Since the beginning of hostilities in 2014, the production activities of the enterprise did not stop. The plant mastered serial production and introduced new types of machinery and equipment to the market. In particular, until 2014, KhMZ LLC produced 86 types of fire-fighting products, at the moment it serially produces 265 types of products, of which 154 types of fire-fighting fittings. Fire-fighting products of KhMZ LLC have passed the necessary tests and have Certificates of Conformity in the Russian Federation.

For more than 80 years, the plant has been continuously operating in its core markets in countries that use GOST standards and exporting products to 26 states. On the territory of the Russian Federation the plant maintains contracts with more than eight hundred enterprises and organizations.

Main types of products:

- fire fittings: carriage trunks, hand trunks, connecting heads, columns, ramifications, hydraulic elevators, foam generators, foam mixers, fire hydrant valves and etc;
- dozens of types of cast products for needs for Russian Railways and subway of the Russian Federation;

- centralizers-turbulators of several types, used in the oil industry when drilling oil wells;
- connecting fittings and locks used in the construction industry during the installation of prefabricated concrete formwork;
- submersible mine electric pump centrifugal units for water;
- electric pump units for industrial and agricultural water supply, for the supply of seawater to offshore platforms, for the needs of cooling systems, as ancillary equipment in the oil industry.

It is planned to manufacture:

- 43 kinds of connecting fire heads, made by injection molding;
- 23 types of fire-fighting equipment in marine design, intended for use in the aggressive salty environment of floating facilities and port facilities;
- 52 types of underground fire hydrants;
- water-lifting columns up to 450 meters high, used in mine drainage systems for the installation of electric submersible centrifugal mine pumping units;
- 6 types of injection powder fire extinguishers and fire extinguishing powder of our own production to charge them.

ENERGOMASH-DONBASS LLC

Address: 12/17 Shutova st., Donetsk, 283080

Tel.: +38 (062) 389-93-28

E-mail: emdua@yandex.ru

Energomash-Donbass LLC specializes in the production of explosion-proof transformer substations intended for the power supply of underground electrical equipment in mines, coal opencast and other mining industries.

Main types of products:

- explosion-proof transformer substations of the PVKT series with a nominal capacity from 100 to 1000 kVA at voltages of 400, 690, 1200 V.

Transformer substations of the PVKT series are certified on the territory of the DPR, the Russian Federation, Belarus, Kazakhstan, etc.

The company has also implemented the production of a dry mobile transformer TSP-160/6-0.23, designed to power rectifier units in AC electrical networks with a frequency of 50 Hz in mines that are not dangerous for gas and dust. In addition to the main activity, Energomash-Donbass LLC performs various types of repair of explosion-proof mine electrical equipment.

Address: 2A Petrovskogo st., Donetsk, 283037
Tel.: +38 (062) 388-80-30, +38 (062) 388-80-35,
+38 (071) 314-56-85
E-mail: arlite@arlite.dn.ua

The company was founded in December 1994 and is a manufacturer of conveyor belts, high-pressure hoses and mining equipment for companies which activities are related to coal production and processing.

Main types of products:

- conveyor belts;
- high pressure hose;
- mining equipment.

Depending on the operating conditions and purpose, Arlite LLC produces conveyor belts:

- general purpose;
- for food industry;
- frost-resistant;
- heat-resistant;
- low-flammable frost-resistant;
- low-flammable.

Conveyor belts are made with a width from 500 mm to 1200 mm on the basis of synthetic polyester fabrics of the EP, PP, RA type with a tensile strength in the

longitudinal direction 100, 125, 160, 200, 250, 315, 400, 500 N / mm with the number of gaskets in the frame from 2 to 6, with a double-sided rubber lining of 2-12 mm and rubber capped edge.

In the production of conveyor belts, high-quality raw materials from world manufacturers are used. The company is equipped with up-to-date technological equipment.

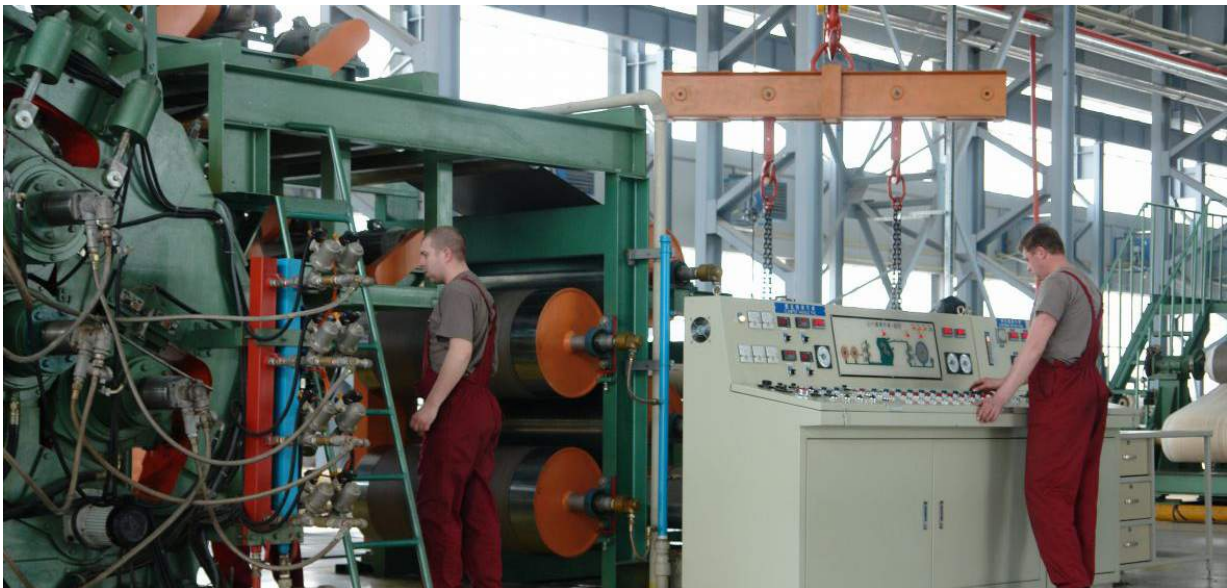

Also, Arlite LLC produces rubber products:

- non-vulcanized rubber mixtures;
- lining plates, rubber and rubber-fabric.

Arlite LLC provides services:

- selection of parameters and justification of the technical and economic feasibility of using a conveyor belt;
- installation and commissioning of a belt conveyor;
- service support of conveyor transport of the enterprise, etc.

The plant has a up-to-date laboratory equipped with a complex of stands and devices for testing.

enterprise

AV STOUN LLC

Address: 1 Avtotransportnaya st.,
Makeyevka, 286155

Tel.: +38 (071) 471-76-70

E-mail: info@avstone.com.ua

AV STOUN (A&VStone) LLC has been registered in the territory of the Donetsk People's Republic since 2019.

Main areas of activity:

- production of fountains, countertops and other granite products.

ARKON MAKKR

Address: 2B Sobinova st., Donetsk, 283009
Tel.: +38 (062) 381-84-92, +38 (071) 469 61-56
E-mail: makkparkon@rambler.ru

ARKON, MAKKR was established in 2016. The company specializes in the production of furniture, windows, doors, furniture for churches.

Production capacity:

- 40-50 units of finished products per month

ATLON LLC

Address: 35 village MakNII, room 2,
Makeyevka, 286108

Tel.: +38 (06232) 218-87, +38 (071) 382-02-02

E-mail: atlon-llc@yandex.ru

Atlon LLC was founded in 2000 and specializes in the construction of roads and the production of materials for covering highways.

Main types of products:

- fine-grained road concrete mix of type A mark 1 and type B grade 1 for the pavement of the upper layers of the road;
- fine-grained road concrete mix type B grade 1 for the pavement of the lower and leveling layers of the road;
- bitumen emulsion EKSH-60.

Production capacity:

- 1200 tons per day.

BETOMIKS LLC

Address: 1 Shakhterov Donbassa st., Donetsk, 283060

Tel.: +38 (071) 334-91-19

E-mail: buh.betomix@gmail.com

Betomiks LLC produces commercial concrete of all types, building solutions, as well as concrete products for construction.

The enterprise is the only one in the DPR for the production of reinforced concrete poles for tower supports. The poles are manufactured in strict accordance with TU 5863-007-00113557-94 and on the basis of drawings corresponding to these specifications.

The composition of ready-mixed concrete for the production of racks was developed by Donetsk PromstroyNIIproekt LLC.

Main types of products:

- commercial concrete of all types;
- building solutions;
- concrete products for construction.

Production capacity:

- SV95-3 pole-260 units per day and SV 105-5 pole-130 units per day;
- fence plate – 4 units per day;
- fence foundation – 4 units per day;

- well ring – 10 units per day;
- foundation block – 260 units per day;
- cable channel overlap plate – 60 units per day;
- concrete curbing -20 units per day;
- squared jumper strap-30 units per day;
- thrust -20 units per day;
- water well floor slab and strip foundation slab – 20 units per day;
- road plate-4 units per day;
- concrete grades from M100 to M400 – 80-90 m³ per hour.

GADITSKIY G. S. PE

Address: 84/12 Panchenko st., 286132, Makeyevka

Tel.: +38 (071) 393-47-56

E-mail: ilicha.dn@gmail.com

Site: <https://elkom.dn.ua>

Gaditskiy G.S. (Elcom Plant) PE introduces up-to-date technologies. The company uses advanced automatic systems for the production of translucent facades, metal-plastic, aluminum and wooden structures, as well as the processing of composite material.

To achieve maximum accuracy and minimize the influence of the human factor, the latest equipment from well-known European manufacturers is used.

The company also performs operations on the manufacture of arches, in compliance with all technological processes and requirements.

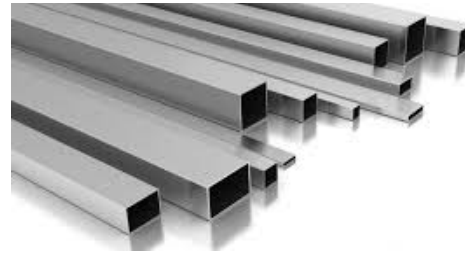

Main areas of activity:

- metal-plastic windows (energy-saving, tinted, sliding, laminated, non-standard);
- aluminum systems (facades, sliding systems, office partitions, winter garden);
- glazing of balconies and loggias;
- louver shutters and roller blinds (sectional doors, louver shutters, protective roller blinds);
- window sills, drip caps, mosquito nets;

- bending of arches.

Production capacity:

- 500 units of finished products per month.

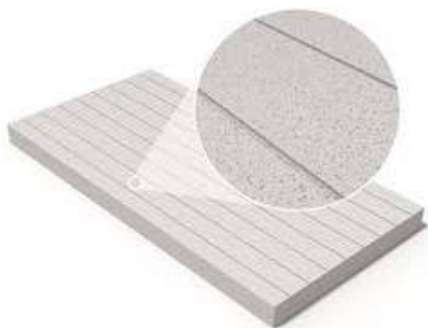

GEOMASH-PLAST LLC

Address: 51/77 Oktyabrskaya st., Khartsyzsk, 286700

Tel.: +38 (071) 329-65-54

E-mail: ufgeomash@gmail.com

Geomash-Plast LLC has been operating since 2021 under the Trademark "Geomash". The company produces expanded polystyrene and facade decor.

Main types of products:

- thermal insulation slabs according to GOST 15588-2014, with a density of PPS 13, size 1000x1000 mm, 1000x2000 mm, of any thickness.

Production capacity:

- up to 700 m³ per month.

GILDIYA GRUPP LLC

Address: 3a Shapovalova st., Donetsk, 283023

Tel.: +38 (071) 314-65-69

E-mail: info@gildia-group.ru

Gildiya Grupp LLC is a mining enterprise established in 2016, combining the rich mining experience of Donbass and modern solutions in the field of mining. In 2020 the company received a license to use the subsoil of the granite deposit in the Starobeshevskiy district.

Main areas of activity:

- production of granite gravel according to GOST 8267, GOST 31424, GOST 7392;
- stone screening dust fraction 0-5 mm (1,2,3 categories).

Main types of products:

- granite gravel fraction 5-10 mm M1200;
- granite gravel fraction 5-20 mm M1000;
- granite gravel fraction 5-20 mm M1200;
- granite gravel fraction 25-60 mm;
- granite gravel fraction 40-70 mm;
- intermediate fraction;
- granite gravel fraction 10-20 mm.

GOLFSTRIM 2006 LLC

Address: 1H Shakhterov Donbassa st.,
Donetsk, 283060

Tel.: +38 (071) 323-24-94, +38 (071) 318-79-44

E-mail: golfstrim.sbyt@gmail.com

GOLFSTRIM 2006 LLC was established in 2015. The company specializes in the production of individual construction products made of concrete.

Main types of products:

- pressed cinder block M100;
- paving slabs;
- pressed sidewalk curb;
- road kerbs.

Production capacity:

- cinder block – 200 pieces per day;
- paving slabs – 150 pieces per day;
- curb – 350 pieces per day;
- road kerbs – 350 pieces per day.

DONKOMMUNSTROY LLC

Address: 11 Levoberezhnaya st., Donetsk, 283003
Tel.: +38 (071) 313-14-59
E-mail: don.dks2015@yandex.ru

Donkommunstroy LLC has been engaged in repair and construction works since 1997 (License for all types of work No. 118391 AB Series).

Since 2003, the company has been engaged in the production of cinder blocks, semi-blocks, joinery, paving slabs, curbs.

The mini-plant for the production of cinder block, FEM tiles, curbs, road kerbs uses the technology of semi-dry vibrocompression and instant demoulding.

The control of the technological process is carried out using industrial computers and under the supervision of maintenance personnel.

Main areas of activity:

- production of small-piece concrete products.

Main types of products:

- cinder block;
- semi-block;
- paving slabs;
- paving elements.

Production capacity:

- cinder block – 3 thousand units per shift;
- semi-block – 12 thousand units per shift;
- FEM (decorative paving tiles) – 220 m³ per shift;
- road kerbs – 0.5 km per shift;
- curb – 1.0 km per shift.

Donspetsprom LLC was founded in 1993. Plant Donspetsprom LLC also provides services for the transportation of concrete-soluble mixtures. Mixers with a volume of 6 m³ are available.

The company has a certified laboratory, issues quality certificates for mortar-concrete mixtures, runs a tests on different types of gravel, cement, sand.

Moreover, Donspetsprom LLC performs works on the production of asphalt concrete, major repairs and restoration of the roadway.

Main types of products:

- concrete;
- cement mortar (all types);
- cinder block;
- FSB;
- road kerbs;
- asphalt concrete.

Production capacity:

- concrete mixes – 2400 m³ per year;
- asphalt concrete – 130 thousand tons per year.

DONETSK PLANT OF BUILDING MATERIALS "ASTOR" LLC

Address: 379 Artemovskaya st., Donetsk, 283077

Tel.: +38 (071) 317-30-09, +38 (062) 343-82-59

E-mail: elena.alitvinenko@gmail.com

Site: astor.dn.ua

Donetsk plant of building materials "Astor" LLC is a modern enterprise with a high technological level of production of ready - mixed concrete, mortars and precast concrete, with a wide range of construction services, as well as a high quality management organization.

The company participates in the program of restoration of destroyed residential and social facilities of the DPR.

The plant is equipped with a technological line SIMEM (Italy) with a fully automated production cycle, which allows to:

- dose materials with an accuracy of 0.5% and guarantee high quality of the concrete mixture;
- adjust the mixing time of the mixture and optimize the loading time of the automixer up to 5 minutes;
- to guarantee the maximum uniformity of the mixture (the lines are equipped with two-shaft activators);
- to obtain mixtures with clearly defined characteristics for strength, water resistance and frost resistance.

The plant "Astor" delivers concrete and mortars by its own concrete mixers with

volumes from 5 to 8 m³ throughout the DPR, provides services for the supply of concrete and mortars with the help of its own special equipment. There is a stationary pump and an automobile concrete pump in the plant.

The plant manufactures and supplies reinforced concrete products for both civil and industrial construction.

Main types of products:

- road curb;
- wall rings;
- floor slabs;
- bottom plates;
- foundation blocks of walls and basements;
- other products made of reinforced concrete.

Production capacity:

- 60 thousand m³ per year of ready-mixed concrete.

INTER-WUD LLC

Address: 19a Bessarabskaya st., Donetsk, 283058
Tel.: +38 (062) 306-22-22, +38 (071) 332-01-83
E-mail: inter_wood@rambler.ru

INTER-WUD LLC was established in 2015. The company specializes in the manufacture of non-standard wooden products. It uses ash, beech, oak, mahogany in their production.

Main types of products:

- doors;
- furniture;
- stairs;
- interior items.

Production capacity:

- 50 doors per month.

STONE PROCESSING PLANT "GRANIT" LLC

Address: 85 Lenina st., Shakhtersk, 286211
Tel.: +38 (071) 366-75-78, +38 (06255) 401-06
E-mail: zavod_granit@mail.ru
Site: zavodgranit.wixsite.com/granit

The stone processing plant "Granit" was established in 2013 on the basis of the stone processing plant "Omfal" and is one of the suppliers of granite.

Today, the plant is a modern enterprise that includes a full production cycle—from the extraction and processing of natural stone to the realization of finished products.

The success of the plant is based on modern equipment, the use of high-quality materials and tools, as well as the professionalism of the employees.

Main areas of activity:

- mining and sawing of granite blocks;
- production of a modular plate and a strip with a thickness of 10, 20 and 30 mm;
- production of plates of non-standard sizes.

KAPUSTYAN T. A. PE

Address: 111 Krasnooktyabrskaya st.,
Donetsk, 283058

Tel.: +38 (071) 441-39-85

E-mail: donzaborcom@gmail.com

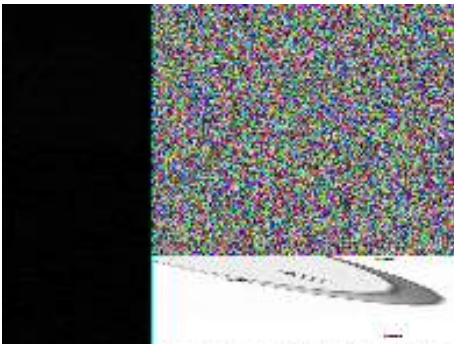

The company specializes in the production of euro fencing, previously it was known as PSK DonZabor.

Main types of products:

- plates 2000x500 mm.

Production capacity:

- 50 units per day of finished products.

LAZAREV A. N. PE

Address: DOF-1, Dokuchaevsk, 286700

E-mail: info.zavod.fakel@gmail.com

PE "Plant" FAKEL "was founded in 1997 and specializes in the production of irrigation systems. All equipment was created in-house - energy-efficient and automated.

The company is constantly researching work to improve the performance of its products, constantly developing new systems for irrigated agriculture on closed and open ground.

Main types of products:

- drip irrigation systems for vegetables, orchards, vineyards;
- misting systems for greenhouses, mycelium plants, green cuttings;
- sprinkler systems, as well as accessories for them;
- misting systems;
- pipes and tubes of various diameters;
- feeding nodes;
- fittings.

Production capacity:

- 500 hectares per year of irrigation systems.

IWT ENGINEERING LLC

Address: 89 Leninsky Prospect, Donetsk, 283080

Tel.: +38 (071) 357-64-41

E-mail: iwtingeering@mail.ru

Site: iwtengineering.ru

IWT Engineering LLC was founded in 2008 by a group of specialists in the field of industrial water treatment and stabilization reagent treatment of water circulation systems, thermal and power boilers.

Main areas of activity:

- engineering and technical and technological assistance for the introduction of chemical reagents;
- comprehensive inspection of water treatment systems, water circulation cycles, steam and hot water boilers;
- test work on the selection of reagents for water treatment and water purification;
- design, installation, supply and maintenance of chemical reagent dosing systems and water treatment equipment.

Main types of products:

- Clean Water-O is a compound corrosion and scale formation inhibitor for open and closed circulating cooling systems of equipment;
- Clean Water-K-reagent is intended for feed water processing of medium-pressure boilers and preventing the deposition of iron oxides in economizers;

- Clean Water-F is a powdered flocculant intended for secondary water purge from suspended substances;
- Clean Water-Fk is a liquid coagulant intended for the deposition of suspended substances in industrial water. Enhances the precipitation properties of the Clean Water – F reagent when used together;
- Clean Water-VT is a non-oxidizing biocide intended for suppressing of most types of biochemical processes in recycled water supply systems;
- Clean Water-DT is an oxidizing biocide based on a chlorine-containing disinfectant intended for suppressing most types of biochemical processes in recycled water supply systems.

Production capacity:

- 15 tons per month.

CDN NO. 2 LLC

Address: 9 Novorossiyskaya st., Donetsk, 283009

Tel.: +38 (071) 314-52-00

E-mail: kdnномер2@gmail.com

Main types of products:

- flexible packaging materials (for dairy products, for household chemicals, for animal products, etc.);
- custom-made packages;
- serial packages;
- secondary polymer granule.

Production capacity:

- up to 200 tons of finished products per month.

The company has a modern technological complex and have a possibility to produce all types of polyethylene packaging.

One more direction in production of OOO KDN No. 2 is the processing of secondary high-and low-pressure polyethylene.

OMEGA LLC

Address: 85 Shevchenko bul., Donetsk, 283017

Tel.: +38 (071) 320-63-06

E-mail: gardenera@yandex.ru

Site: omega.dn.ua

LLC "Omega" was founded in 1997 and is a high-tech production for the production of finishing and paints and varnishes.

Main types of products:

- water-dispersion and acrylic paints;
- primers;
- drying oils;
- stains;
- alkyd enamels;
- glue (water-dispersion);
- alkyd lacquers;
- solvents;
- roofing materials;
- rust converters.

The company develops new directions taking into account the growing requirements of customers who pay attention not only to the functionality of goods, but also to the safety of used materials.

Two production laboratories are equipped with up-to-date equipment, they control

the quality at all stages of production – from raw materials to the finished product.

The entire range of products of LLC Omega meets the established standards and requirements. This is confirmed by quality certificates, conclusions of sanitary and epidemiological expertise and other necessary documents.

DARY PRIROODY LLC

Address: 42 Gornyakov avenue, Enakievo, 286422

Tel.: +38 (071) 337-50-69

E-mail: dp.otchetnost@gmail.com

LLC Dary prirody is a high-tech enterprise, a leader in the production, sale and transportation of industrial gases for enterprises in the international and domestic directions.

Provides professional services in the field of installation, repair and technical examination of cryogenic equipment, gas distribution systems, installation of technological pipelines (wiring lines for laboratories, hospitals, etc.).

Main areas of activity:

- production of industrial and food gases;
- production of medical and technical oxygen.

Main types of products:

- liquid nitrogen, gaseous nitrogen in cylinders;
- liquid argon, gaseous argon in cylinders;
- liquid oxygen, technical, medical;
- technical and medical gaseous oxygen in cylinders;
- carbon dioxide, liquid, gaseous, in cylinders;
- propane-butane in cylinders;
- helium gas in cylinders.

SCIENTIFIC AND PRODUCTION ENTERPRISE "SINTEZ" PE

Address: 1B Stepnogorskaya st., Donetsk, 283032

Tel.: +38 (071) 334-21-54, +38 (071) 334-21-55

E-mail: sintez2021@mail.ru

PE Scientific and Production Enterprise "SINTEZ" was established in 1999.

The enterprise produces more than 100 types of composite materials (adhesives, binders, compounds, glass, carbon, organoplastics, including 90% of its own developments), has all the necessary equipment, highly qualified chemists, a number of employees have academic degrees and conduct effective activities for the development of new materials and technologies.

Main areas of activity:

- design, manufacture and supply of new materials for different purposes – epoxy, phenolic-formaldehyde one-pack quick-setting of structural adhesives, adhesive sealants, plastisols;
- the cold curing glues, binders, compounds, gel coats, glass-, carbon-, and organic plastics, other composite materials for various industries – oil and gas, mining, construction, automotive, machine-building, metallurgical, electronic and etc.

The company works with more than 50 enterprises in the Russian Federation, as well as with enterprises in the DPR.

Main types of products:

- epoxy single-pack quick-curing glues of the UP 5-207, UP 16-07, UP 5-240, UP 5-207M, UP 16-06, etc series;
- conductive adhesives of the UP-5-201 series;
- adhesives of the ST18-08 series for gluing labels and excise stamps in the alcoholic beverage industry;
- phenol-formaldehyde adhesives of the BFR-2K, BFR-4K, BF-2, BF-4 series, etc. for microelectronics;
- heat-resistant adhesives for brake pads of the VS-10T, UVS-10TS, VS-350 series;
- epoxy compounds of more than 30 series, including series K-126, K-153, K-115, UP 592-10, UP5-162, etc.;
- epoxy binders of the EDT, UP, KDA-KH, KDA-KHD, KDA-KHI series for glass, carbon, organic plastics;
- heat-resistant phenolic binders of the UP-3171 series for inserts of rolling mills;
- accelerators of the UP-1, UP-2 series for high-speed production of fiberglass reinforcement;
- adhesives for gluing aluminum-ceramic tiles and hydrocyclones of mineral-processing equipment protection from hydroabrasive wear.

POLIDON LLC

Address: 35 Shchetinina st., 283119, Donetsk
Tel.: +38 (071) 370-95-31
E-mail: polidon2014@hotmail.com, polidonbux@mail.ru

LLC "Polidon" was founded in 1996 and specializes in the production of polyethylene products by rotary forming (centrifugal forming).

Main types of products:

- polyethylene containers;
- polyethylene containers for food purposes;
- canisters;
- polyethylene vases;
- polyethylene products for agriculture;
- polyethylene containers;
- plastic barriers;
- plastic slides and playgrounds.

PRODUCTION AND COMMERCIAL CENTER "STALKER" MUNICIPAL UTILITY

Address: 1 Far East st., Makeevka, 286118

Tel.: +38 (071) 320-63-83

E-mail: guma_stalker@mail.ru

The Production and Commercial center "Stalker" was established in 1991 and specializes in the manufacture of rubber products for the needs of the agro-industrial complex.

Main types of products:

- components (tires of atmospheric pressure of the press-wheel coverer, tubes of seed and fertilizer funnels) for companies producing agricultural machines.

Production capacity:

- up to 400 thousand products per year.

DON PAK LLC

Address: 90a Ilyicha Avenue, Donetsk
Tel.: +38 (071) 379-10-11, +38 (062) 382-94-58,
+38 (062) 382-94-60
E-mail: donpakgofra@list.ru

The company was founded in 1999 and specializes in the production of corrugated board and corrugated board packaging. Corrugated cardboard DON PAK LLC is the basis for the production of environmentally friendly containers and individual packaging for many industries.

Main types of products:

- three-layer corrugated cardboard (from two flat and one corrugated layer) of the t-21, t-22, t-23, t-24 types, profile "C" according to GOST7376-89;
- two-layer corrugated cardboard (from a flat and one corrugated layer) of the t-21, t-22, t-23, t-24 brands, profile "C" according to GOST7376-89;
- packaging made of corrugated cardboard – corrugated boxes.

The colors of the liners (cover layers) are reddish black, milky or white. During production, a multi - color print is applied to the corrugated cardboard and transport package could be used as promotional products. The printing method used in the production of containers is characterized by simplicity and economy, so the application of flexoprinting will not have serious effect on the final cost of the order. The quality of the prints is comparable to the quality of gravure printing. The printing is environmentally friendly, water-based paints are used.
